

# **Read Before Assembly**

**1. Read the manual before assembly. Each step includes a video and important notes. Professional assemble suggested.**

**2. Mattress must weigh at least 80 lbs. Suggest Mattress Thickness : 8 inch-10inch. Mattress not included.**

**3. Installation requires secure to wood studs or masonry. Anti-tip hardware for brick/concrete walls is included.**

**4. Have one person hold or sit on the empty bed frame when installing the hydraulic system to prevent pinch injuries.**

**5. Please do not remove the iron straps compressing the hydraulic rods until you attach them to the body. Removing it early will cause the rod too long to fit into the predrilled hole.**
