

Wheels

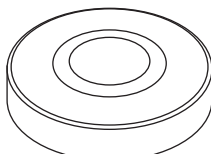

**Assembly
Time:**
Less than
15 minutes.

A 2 ea
Wheel

B 2 ea
Wheel with lock

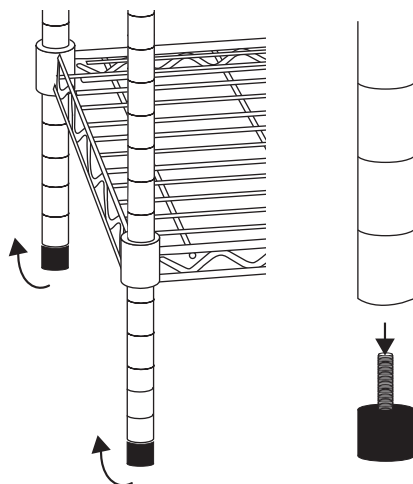

C 4 ea
Bumper

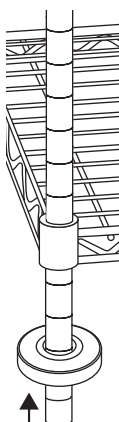

This product is intended to supplement Shelving. Adding these wheels will allow mobility to the shelving.

Tools Needed: No tools required.

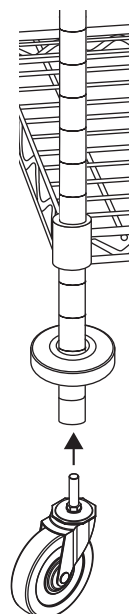

STEP 1. If there are leveler feet installed on your Shelving unscrew them and remove.

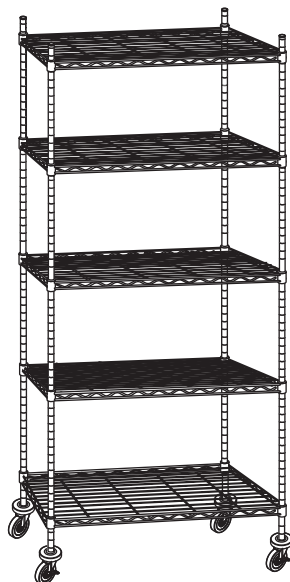

STEP 2. Slide a plastic bumper up from the bottom of each pole about 4 to 6 inches. The smooth side faces up.

STEP 3. Install the wheel by screwing it into the threaded hole on the bottom of each pole. Then slide the bumper down to the bottom of the pole.

STEP 4. Repeat the steps above for all four corners. Make sure you place the locking wheels in the desired location for your specific use, usually at the front side that can be accessed easily.
