

Installation Tutorial

1. When you receive the goods, please take out the accessories and first install the legs for our lower cabinet.

First, slide the small washer onto the screw, followed by the large washer. Then, screw the assembled screw into the corresponding hole, the installation of the leg is complete.

2. Next, we need to connect the shelves and the cabinets together.

Screw in the bolts on the top and bottom of the connecting plate, and with that, the installation of the upper and lower cabinets will be finished.

Note: Due to different production batches, the styles of the accessories may be adjusted, but the connection methods remain the same. Please don't worry.
