

Specifications:

Model: 150 type grain grinder

Product size: 58*43*27cm/22.83*16.93*10.63inch

Packing size: package1(motor): 55.5*32*33.5cm(23.5kg); package2(funnel+ accessories): 27*22*28cm(0.6kg)

Industry standard power: 3000W

Rated voltage: 110V, 60HZ

Rated speed: 1400r / min

Drill diameter: 150mm

Direction of rotation: counterclockwise

It can grind corn, rice, wheat, sorghum, and coffee (coffee needs to be cleaned in time after grinding)

Applicable places: supermarket, vegetable market, grain and oil shop, grain mill, University Research Institute

Milling details:

Corn $\geq 60\text{kg} / \text{h}$

Rice $\geq 75\text{kg} / \text{h}$

Wheat $\geq 75\text{kg} / \text{h}$

Paddy rice $\geq 50\text{kg} / \text{h}$

Packages:

1 x 110V Grinder machine

1 x funnel

Warm note:

1. This is a high-speed commercial pulverizer. Its power is 3000W, and its grinding speed is more than 120 pounds of grain per hour. It is suitable for commercial processing of a large number of grains. It can pulverize efficiently, and there will be some noise in kitchen and household
2. Our products are divided into two packages (host + funnel). If you only receive the host or the funnel, please contact us in time to inquire about the logistics distribution
3. 150 type mill can only dry mill, not wet mill, otherwise it will rust
4. The product is made of cast iron. After long shipping time, some products will rust, so rust can be removed with derusting water
5. Before using this equipment, please do not tighten the screw of grinding blade too tightly, which will damage the blade
6. If you don't receive the product accessories or the product accessories are damaged, please contact us to reissue them in time
