

Installation Instructions

Certificate Installation:

Insert certificate into the document display pouch and attach the adhesive side of the hook and loop fasteners to the pouch. Open the back board and choose your desired display position.

Flag Installation:

Open the back board and choose your desired display position.
(Attached folding instructions for your reference.)

Wall Installation:

Measure the distance between the two holes on the rear of the case. Mark these measurements on the wall and ensure they are level.
Make pilot holes to install proper wall anchors and hardware then lift the case into position and latch it onto the screws.

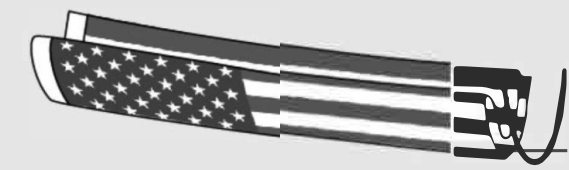

1- To properly fold the flag, begin by holding it waist-high with another person so that it's surface is parallel to the ground.

2- Fold the lower half of the stripe section lengthwise over the field of stars, holding the bottom and top edges securely.

3- Fold the flag again lengthwise with the blue field on the outside.

4- Make a triangular fold by bringing the striped corners of the folded edge to meet the open (top) edge of the flag.

5- Turn the outer (end) point inward, parallel to the open edge, to form a second triangle.

6- The triangular folding is continued until the entire length of the flag is folded in this manner.

7- Continue folding until you have one square of the blue field left. Fold the open corner of the square toward the closed edge. Tuck the resulting triangle into the rest of the flag.
