

## To Set 6 Shower Head Settings and Change Angle

Turn Dial Lever (Fig. 4) to select desired water pattern while holding Shower Head with free hand to prevent loosening of its connection. Swivel Shower Head around ball joint to set desired angle.

## Use Pause Mode to Save Water

*For your protection, Pause mode doesn't shut off water completely.*

For safety (to prevent pressure buildup), Pause mode has water dripping instead of complete shut-off (Fig. 5). After use, DO NOT leave Shower Head dial set to Pause mode.

## Extra-low Water Pressure? You can remove Flow Regulator.

As mandated by U.S. federal law, this shower head is equipped with water flow regulator that limits maximum water flow to 2.5 gallons (9.5 liters) per minute at 80 psi water pressure. In areas with extremely low water pressure causing the shower water flow to be unsatisfactory, the flow regulator may be removed to improve the water flow in the shower head. Using screwdriver point or long nose pliers, pull out Water Regulator located deep inside Nut underneath Mesh Washer (Fig. 6).

## Cleaning Instructions

Cleaning maybe required when mineral deposits appear on jet tips. Clean flexible nozzles by rubbing with a finger or soft bristled toothbrush, or clean with 50% white vinegar/water solution. Do not clean or rinse any part with harsh chemicals, heavy-duty cleaners or abrasives. This may damage parts or finish and may void warranty.

*If you have installation problem or missing parts, please DO NOT return this product before calling us first. We can help on the phone or by quickly sending needed parts.*
