③

121 crystal balls

④

## Installation steps

**Install hanging board**

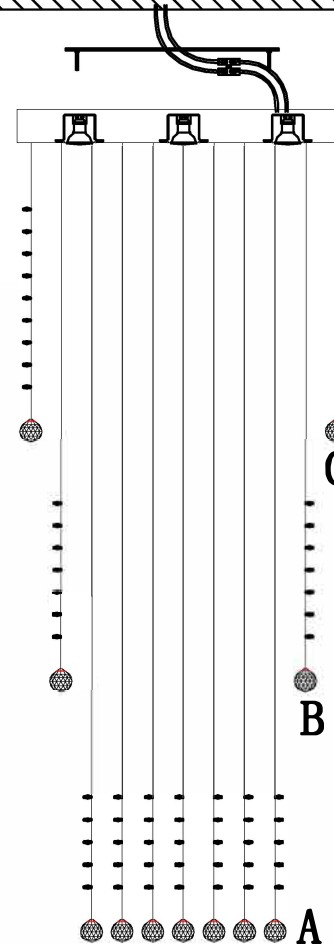

**Assemble the light source on the lamp body and screw the lampshade**

**Regulating Wiring Length**

**Fixed the set-top box and locked the bottom branches of the set-top box**

## Installation Notes

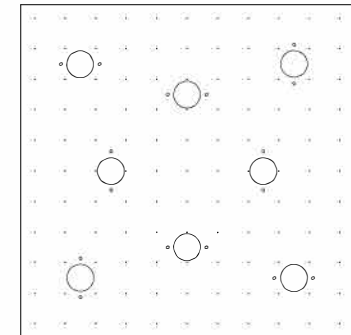

- 1: When installing, attention should be avoided on the surface and wires of lamps and lanterns, and gloves should be worn when installing.
- 2: White or red light wiring should be connected with fire line (L), black or blue TV core line (N), double-wire or bare copper grounding line (G).
- 3: Lamps should not be close to acid, alkali, salt and other corrosive chemicals or gases. They should not be washed with water. They can be wiped with clean soft cloth.
- 4: When the lamp is working normally, the bulb and accessories will produce high temperature. Do not touch it with your hands to avoid the risk of scald.
- 5: When installing, cleaning lamps and regulating light sources, the power supply must be cut off first.
- 6: In particular, when installing glass articles, the application force is appropriate to avoid glass cracking.

A. Hanging string + star anise beads  
+ 40 pieces of crystal ball 49 strings

B. Hanging string + star anise beads  
+ 40 pieces of crystal ball 32 strings

C. Hanging string + star anise beads
