

Pendant Light Installation Instructions

(With Cord)

1. Remove Gasket & Ring. Start with the lamp socket. Remove the clear rubber gasket and white plastic ring from it.
2. Mount the Ceiling Plate & Adjust Height. Thread the pendant cord through the ceiling plate. Adjust the hanging height to your preference, then tighten the screw on the ceiling plate to secure the cord at that height.

3. Position the Socket. Place the lamp socket on top of the lampshade.

4. Secure the Socket. From the bottom of the lampshade, first insert the clear rubber gasket, followed by the white plastic ring, to lock the socket in place. Note: Ensure the flat side of the white plastic ring faces the socket.

5. Final Connection. Connect the wires following electrical safety guidelines, install the light bulb, and your fixture is ready for use.

(With Rod)

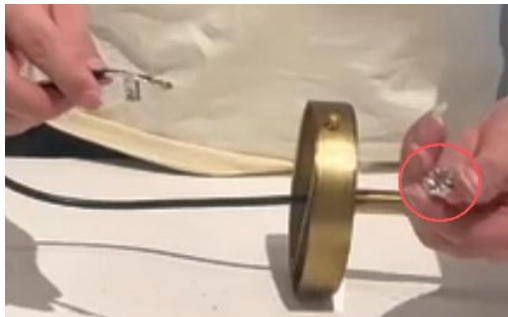

1. Pass the pendant cord through the hollow golden rods. Use the number of rods needed to achieve your desired hanging height.

2. After the rods, continue threading the cord through the center hole of the ceiling plate.

3. Place the silver serrated cable grip (the uneven metal piece) over the cord at the top. Insert the screw through the grip and into the designated hole on the ceiling plate. Tighten the screw firmly to clamp and lock the cord in place.

4. Place the lamp socket on top of the lampshade.

5. From the bottom of the lampshade, first insert the clear rubber gasket, followed by the white plastic ring, to lock the socket in place. Note: Ensure the flat side of the white plastic ring faces the socket.

6. Final Connection. Connect the wires following electrical safety guidelines, install the light bulb, and your fixture is ready for use.
