

LED knobs installation instructions

1. Twist off the cap counterclockwise to open the cap.

2. Put the batteries in the knobs

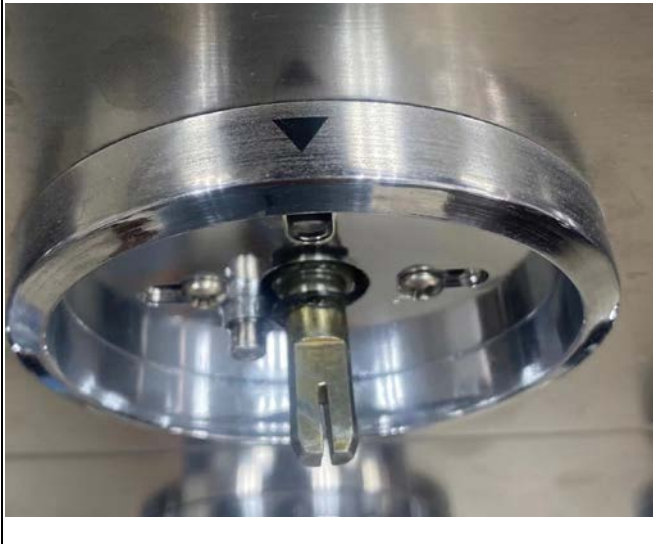

3. Match the arrow with the black line, and twist clockwise to close the cap.

4. Remove the original knobs by hand pulling off.

5. Remove the four screws attached on the original knob bezels, and remove the bezel to install the new ones.

6. Put on the new bezel with black arrow facing upward.
(Important Step: it would make sure the magnet on the bezel would trigger the LED lighting)

7. Put on the knobs with matching arrows.
