

HOW TO USE SMART BRACKETS

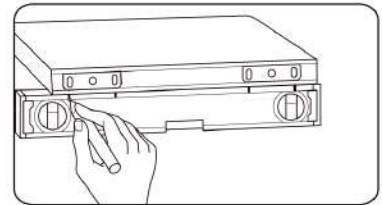

✓ Correct position ✗ Incorrect position

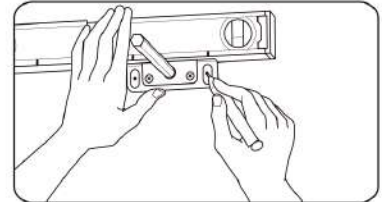

Scan to watch the installation video

STEP 01

MARKS

01 Make marks opposite the holes in the brackets

02 Move marks on the wall

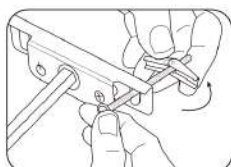

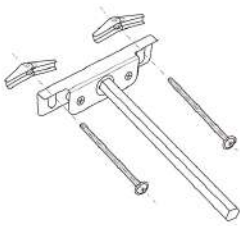

03 Determine if there are studs behind the wall where you want to mount the bracket

STEP 02

HOW TO INSTALL BRACKETS

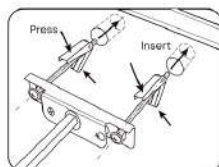

Option №01: without studs

Assembly

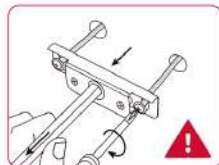

The open part of the wings should be facing the head of the bolt.

Thread the bolt to a depth of about four or five threads.

Drill holes with a 3/8" bit.

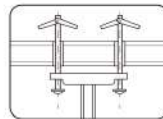

PULL towards you while you tighten the bolt

Wall mounting

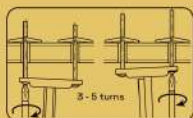

Shut the pair of wings.

Push the toggle bolt (with the bracket attached) into the hole in the wall until you can feel the wings spring open.

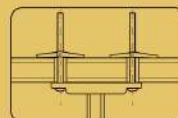

Pull the bracket and the bolt forward (toward you) until the pair of wings contact the back of the wall. Keep this pressure constant as you turn the bolt clockwise.

Continue to turn the toggle bolt until the bracket is tightly attached to the wall.

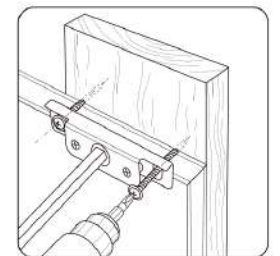

Tips

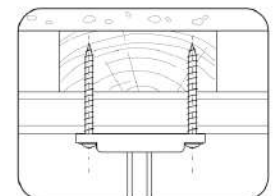

Maintain pressure on the screw outside the wall when using the screwdriver and tighten the bolts in 3-5 turns alternately step by step.

Option №02: in studs

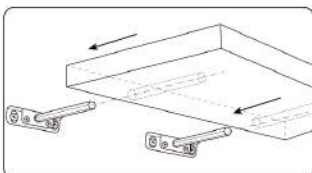

Mount the screws (included) with bracket into the wall where there is a stud

STEP 03

INSERT THE SHELF

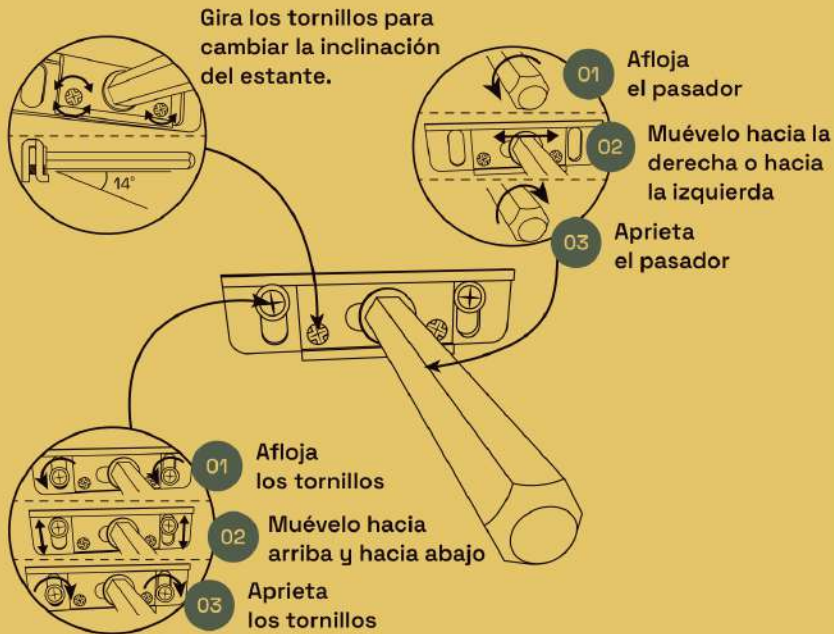

Insert the shelf onto the installed brackets.

If the shelf does not mount on the brackets, go back to the step on "How to use brackets" and adjust the brackets or contact us.

CÓMO USAR SOPORTES INTELIGENTES

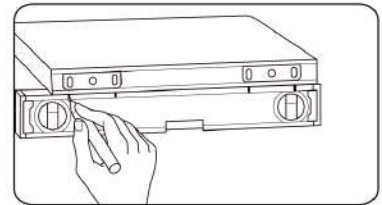

✓ Posición correcta ✗ Posición incorrecta

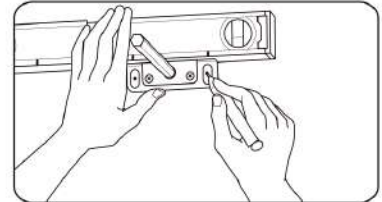

Escanear para ver el video de instalación

PASO 1

MARCAS

01 haz marcas opeatas a los agujeros en los soportes

02 traslada las marcas a la pared

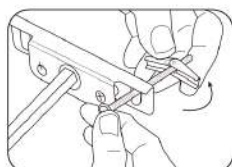

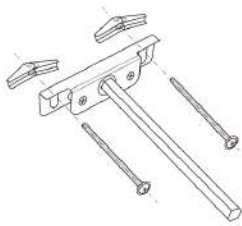

03 Determina si hay montantes detrás de la pared donde quieres montar el soporte.

PASO 2

CÓMO INSTALAR LOS SOPORTES

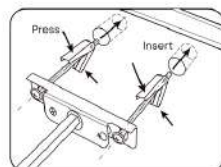

Opción Nº1: sin montantes

Montaje

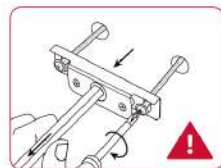

La parte abierta de las alas debe estar frente a la cabeza del tornillo.

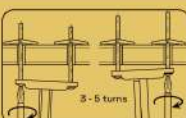

Enrosca el tornillo a una profundidad de unos cuatro o cinco hilos.

Taladra agujeros con una broca de 3/8 pulgada

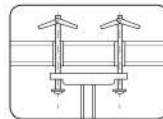

TIRA hacia ti mientras aprietas el tornillo

Montaje en pared

Cierra el par de alas.

Empuja el perno palomilla (con el soporte adjunto) en el agujero en la pared hasta que puedas sentir que las alas se abren.

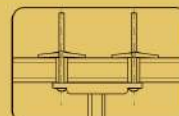

Tira del soporte y el tornillo hacia adelante (hacia ti) hasta que el par de alas contacte con la parte trasera de la pared. Mantén esta presión constante mientras giras el tornillo en sentido horario.

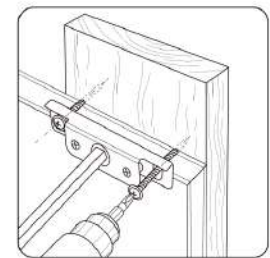

Continúa girando el perno palomilla hasta que el soporte esté firmemente sujeto a la pared.

Consejos

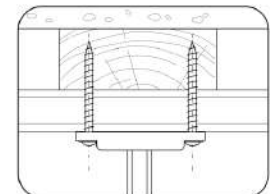

Mantén la presión sobre el tornillo fuera de la pared cuando uses el destornillador y aprieta los tornillos en 3-5 vueltas alternativamente, paso a paso.

Opción Nº2: en montantes

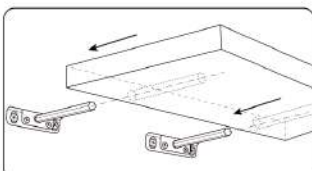

Monta los tornillos (incluidos) con el soporte en la pared donde hay un montante

PASO 03

INSERTA EL ESTANTE

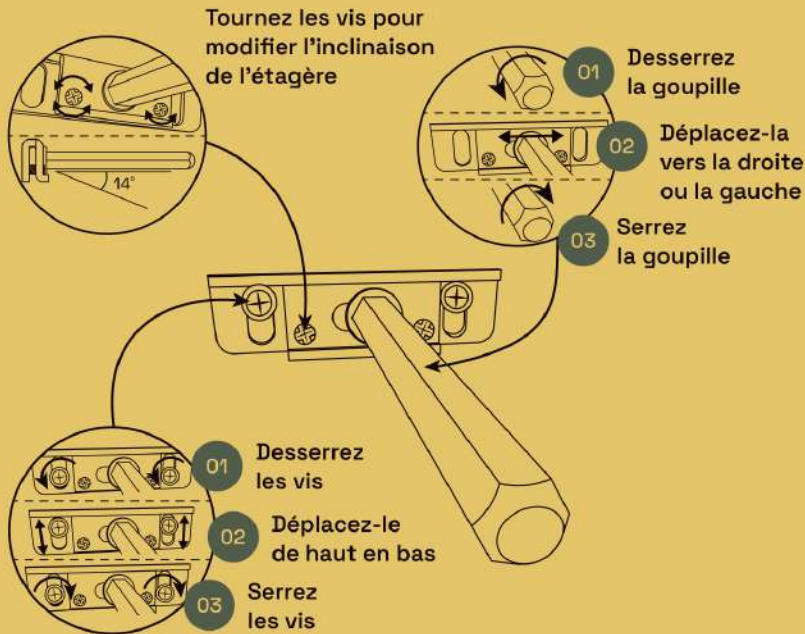

Inserta el estante en los soportes instalados.

Si el estante no se monta en los soportes, vuelve al paso sobre «Cómo usar soportes» y ajusta los soportes o contáctanos.

COMMENT UTILISER LES SUPPORTS INTELLIGENTS

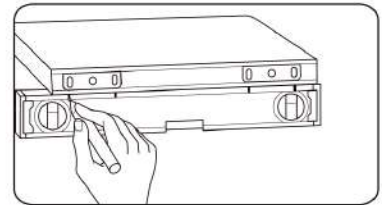

✓ Position correcte ✗ Position incorrecte

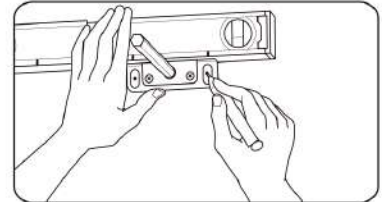

Scannez pour regarder la vidéo d'installation

ÉTAPE 1

MARQUES

01 Faites des marques en face des trous des supports

02 Déplacez les marques sur le mur

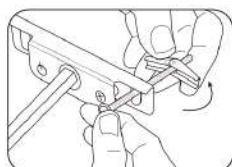

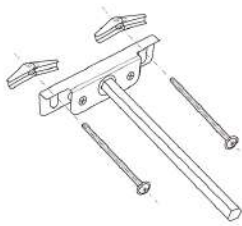

03 Déterminez s'il y a des montants derrière le mur à l'endroit où vous voulez monter le support.

ÉTAPE 02

COMMENT INSTALLER LES SUPPORTS

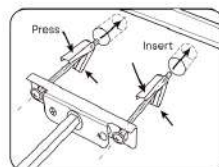

Option n°1: Sans montants

Montage

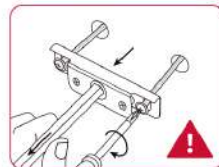

La partie ouverte des ailes doit être orientée vers la tête du boulon.

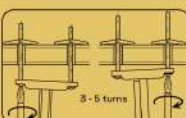

Vissez le boulon à une profondeur d'environ quatre ou cinq filets.

Percez les trous à l'aide d'une mèche de 3/8"

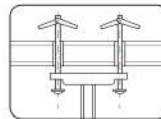

Tirez vers vous pendant que vous serrez le boulon.

Fixation au mur

Fermez la paire d'ailes.

Poussez le boulon à genouillère (avec le support fixé) dans le trou du mur jusqu'à ce que vous sentiez que les ailes s'ouvrent..

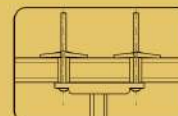

Tirez le support et le boulon vers l'avant (vers vous) jusqu'à ce que la paire d'ailes entre en contact avec l'arrière du mur. Maintenez cette pression constante pendant que vous tournez le boulon dans le sens des aiguilles d'une montre.

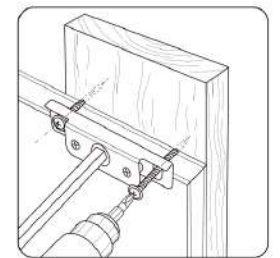

Continuez à tourner le boulon à bascule jusqu'à ce que le support soit solidement fixé au mur

Conseils

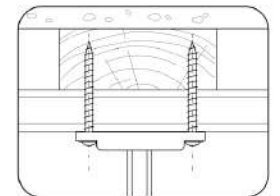

Maintenez la pression sur la vis à l'extérieur du mur lorsque vous utilisez le tournevis et serrez les boulons de 3 à 5 tours en alternance, étape par étape.

Option n°2: avec montants

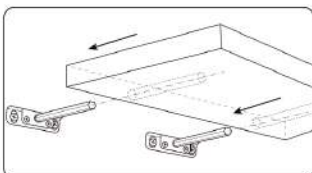

Fixez les vis (incluses) avec le support dans le mur à l'endroit où il y a un montant.

ÉTAPE 03

INSÉREZ L'ÉTAGÈRE

Insérez l'étagère sur les supports installés.

Si l'étagère ne s'installe pas sur les supports, revenissez à l'étape «Comment utiliser les supports» et ajustez les supports ou nous contacter.
