

TruWrap® Curved Wide & Medium

True Style. True Performance

The innovative TruWrap from our collection is a contemporary twist on classic lighting, offering a high-quality LED solution for general purpose illumination. Embodying the familiar comfort of traditional wraps, TruWrap integrates seamlessly into daily spaces with its low-profile elegance. Not only is it an economical choice for today's savvy shopper, but its LED efficiency promises long-term energy savings. Choose TruWrap for a blend of modern style and enduring performance.

Features and Benefits

- TruWrap showcases a very shallow 2" profile and curved diffuser that delivers a modern aesthetic blending form with function to elevate contemporary spaces
- Available in both wide and medium profiles to cater to diverse design needs and spatial dimensions
- Offers a selection of three color temperatures (CCTs): 3000K, 4000K, and 5000K, as well as three adjustable lumen outputs (ALO) low, medium, and high providing versatile lighting options for any ambiance
- Product footprint matches numerous existing fixtures allowing it to cover old blemishes ensuring a clean refreshed look without the need for repainting
- Perfect for illuminating a variety of settings including locker rooms, storage areas, hallways, and offices, enhancing functionality and design

Wide

Medium

True Style. True Performance

1 Lumen Package

- Curved Medium 4,000 | 5,000 | 6,000
- Curved Wide 5,500 | 6,500 | 7,500

2 Mounting Options

- TruWrap offers versatile mounting options including support for J-box, stem, and suspension setups, making it adaptable to virtually any ceiling installation challenge
- Designed with conduit end feed and through-wire compatibility, TruWrap ensures a hassle-free installation, allowing for easy, direct connections and streamlined electrical integration

3 Performance

- Enhance any area with TruWrap's sleek 2" profile providing a clean, contemporary upgrade
- TruWrap features state-of-the-art microprismatic technology for a uniformly lit environment
- Integrated CCT (color temperature) & ALO (adjustable lumen output) switching capability, along with multi-volt (120-277 VAC) compatibility provide flexibility for your preferences and application. 0-10 V dimming capability allows you to set light levels to your liking.
