

Hello! Thank you for purchasing the decal from us! We are thrilled to work for you and make it perfect. IF any questions arise, don't hesitate to contact us!

★★★ WE WILL GREATLY APPRECIATE THE FEEDBACK★★★

We thank you in advance!

Each decal will arrive as three layers of material. The top layer is clear transfer tape, which is used to apply the decal. The second layer is the vinyl film, which is the decal itself. The bottom layer is the backing paper. When you receive your decal in the mail, lay it flat and firmly wipe a credit card or application squeegee across the top of the transfer tape. This helps to make sure the transfer tape properly adheres to the decal.

☐ There are two specific types of application, wet and dry.

☐ Vinyl Decal DRY Application Instructions

(great for multicolor decals, wall decals, small size decals)

Tools of the trade:

- plastic squeegee or credit card
- blue painters tape
- measuring tape

Steps toward perfection:

Step 1. Completely clean and dry the desired application surface.

Step 2. Carefully peel the backing paper from the decal at a sharp angle.

Step 3. Align the decal and press it onto the desired surface. Firmly run a credit card across the transfer tape to make sure the decal adheres to the surface.

Step 4. Slowly peel the transfer tape from the top of the decal. If any part of the decal starts to come up with the tape, run over that part of the decal with a credit card and try to peel the tape again.

☐ Vinyl Decal WET Application Instructions

(great for car vinyl graphics, vinyl to go on glass)

Tools:

- plastic squeegee or credit card
- spray bottle w/ a mixture of 98% water, 2% dish soap
- measuring tape (optional)
- hair blower (optional)

Steps toward perfection:

- clean the intended spot of placement thoroughly
- spray down your area (wall, car) w/ the water/dish soap mixture
- remove the paper backing from the clear application tape and decal
- spray the adhesive side of the decal w/ the water/dish soap mixture
- place your decal in the desired position, measure out w/ the measuring tape for perfection
- rub over the application tape and decal w/ a squeegee or credit card from the center out, until as much of the water/dish soap mixture is no longer underneath the application tape and decal
- you can use the hair blower to dry the surface or you can just leave it to dry by itself
