

OUTDOOR PLAYHOUSE

Instruction manual

TLG 91045

WARNING:
Adult assembly required.

WARNING:

To reduce the risk of serious injury, please read and follow these instructions. Keep and refer to instructions as needed and pass along to any future owners of this item.

E-mail Service : bierumbaby@hotmail.com

Please read and keep the manual properly, it contains important information.

WARNINGS AND SAFE PLAY INSTRUCTIONS

 **CONTINUOUS ADULT SUPERVISION REQUIRED.** Most serious injuries on playground equipment have occurred while children were unsupervised! Our products are designed to meet mandatory and voluntary safety standards. Complying with all warnings and recommendations in these instructions will reduce the risk of serious or fatal injury to children using this play system. Go over the warnings and safe play instructions regularly with your children and make certain that they understand and follow them. Remember on-site adult supervision is required for children of all ages.

WARNING

CHOKING HAZARD/SHARP EDGES & POINTS

Adult assembly required. This product contains smallparts and parts with sharp edges and points. Keep parts away from children until fully assembled.

STRANGULATION HAZARD

- **NEVER** allow children to play with ropes, clotheslines, pet leashes, cables, chains or cord-like items when using this playhouse or to attach these items to the playhouse.
- **NEVER** allow children to wear loose fitting clothing, ponchos, hoods, scarves, capes, necklaces, items with draw-strings, cords or ties when using this playhouse.
- **NEVER** allow children to wear bike or sport helmets when using this playhouse.

Failure to prohibit these items, even helmets with chin straps, increases the risk of serious injury and death to children from entanglement and strangulation.

TIP OVER HAZARD

Choose a level location for the equipment. This can reduce the likelihood of the playhouse tipping over and loose-fill surfacing materials washing away during heavy rains.

DO NOT allow children to play on the playhouse until the assembly is complete.

PLACEMENT

Place the toy on a level surface at least 2m from any structure or obstruction such as fences, garages, house, overhanging branches, laundry or electrical wires.

WARNING – Safe Play Instructions

- ✓ Dress children with well fitting and full foot enclosing footwear.
- ✓ Check for splintered, broken or cracked wood; missing, loose, or sharp edged hardware. Replace, tighten and or sand smooth as required prior to playing.
- ✓ Replace defective parts in accordance with manufacturer's instructions.
- ✗ Do not allow children to wear open toe or heel footwear like sandals, flip-flops or clogs.
- ✗ Do not permit climbing on equipment when it is wet.
- ✗ Do not permit rough play or use of equipment in a manner for which it was not intended. Standing or climbing on or jumping from the roof.

Instructions for Proper Maintenance

Your Playhouse System is designed and constructed of quality materials with your child's safety in mind. As with all outdoor products used by children, it will weather and wear. To maximize the enjoyment, safety and life of your Playhouse, it is important that you, the owner, properly maintain it.

Check the following at the beginning of the play season:

HARDWARE:

- ✓ Check metal parts for rust. If found, sand and repaint using a non-lead paint complying with 16 CFR 1303.
- ✓ Inspect and tighten all hardware. On wood assemblies **DO NOT OVER-TIGHTEN** as to cause crushing and splintering of wood.
- ✓ Check for sharp edges or protruding screw threads, add washers if required.

WOOD PARTS:

- ✓ Check all wood members for deterioration, structural damage and splintering. Sand down splinters and replace deteriorated wood members. As with all wood, some checking and small cracks in grain is normal.
- ✓ Applying a water repellent or stain (water-based) on a yearly basis is important maintenance to maintain maximum life and performance of the product.

Check twice a month during play season:

HARDWARE:

- ✓ Inspect for tightness. Must be firmly against, but not crushing the wood. **DO NOT OVER-TIGHTEN.** This will cause splintering of wood.
- ✓ Check for sharp edges or protruding screw threads. Add washers if required.

If you dispose of your playhouse: Please disassemble and dispose of your unit so that it does not create any unreasonable hazards at the time it is discarded. Be sure to follow your local waste ordinances.

KEYS TO ASSEMBLY SUCCESS

Tools Required

• Carpenters Level • Carpenters Square	• Claw Hammer • Tape Measure • #1 Phillips, #2 Robertson and Screwdriver	• Standard or Cordless Drill • Pencil	• Safety Glasses • Adult Helpers

Part Identification Key

On each page, you will find the parts and quantities required to complete the assembly step illustrated on that page. Here is a sample.

ABOUT OUR WOOD

Classic outdoor playhouse systems uses only premium playset lumber, ensuring the safest product for your children’s use .Although we take great care in selecting the best quality lumber available ,wood is still a product of nature and susceptible to weathering which can change the appearance of your set.

What causes weathering? Does it affect the strength of my Play System?

One of the main reasons for weathering is the effects of water (moisture); the moisture content of the wood at the surface is different than the interior of the wood. As the climate changes, moisture moves in or out of the wood, causing tension which can result in checking and or warping. You can expect the following due to weathering. These changes will not affect the strength of the product:

- 1. **Checking** is surface cracks in the wood along the grain. A post (4” x 4”) will experience more checking than a board (1” x 4”) because the surface and interior moisture content will vary more widely than in thinner wood.
- 2. **Warping** results from any distortion (twisting, cupping) from the original plane of the board and often happens from rapid wetting and drying of the wood.
- 3. **Fading** happens as a natural change in the wood color as it is exposed to sun-light and will turn a grey over time.

How can I reduce the amount of weathering to my Play System?

At the factory we have coated the wood with a water repellent or stain. This coating decreases the amount of water absorption during rain or snow thus decreasing the tension in the wood. Sunlight will break down the coating, so we recommend applying a water repellent or stain on a yearly basis (see your local stain and paint supplier for a recommended product).

Most weathering is just the normal result of nature and will not affect safe play and enjoyment for your child.

BATTERY WARNINGS

DANGER

Risk of explosion!

Risk of explosion if the battery is replaced by an incorrect type.

Please strictly observe the following use warnings, misuse or abuse may result in leakage, rupture, or fire, and may cause personal injury.

- Do not mix old and new batteries.
- Do not mix different types of batteries.
- Insert batteries with the correct polarity.
- Remove exhausted batteries from the toy.
- Follow the battery manufacturer's warnings and recommendations.
- Never attempt to recharge primary batteries.
- Never short circuit batteries as this may lead to high temperatures, leakage, or rupture.
- Never heat batteries to revive them.
- Remember to switch off the toy after use.
- Never attempt to disassemble, crush, puncture, or open batteries.
- Keep batteries out of the reach of children, especially small batteries that could be easily ingested.
- Clean the battery contacts and also those of the device before battery installation.
- Remove batteries from the toy that is not to be used for an extended period. Remove used batteries promptly.

BEFORE FIRST USE

DANGER

Risk of suffocation!

Keep any packaging materials away from children and pets-these materials are a potential source of danger, e.g. suffocation.

- Remove all the packing materials.
- Remove and review all components before starting assembly.
- Check the toy for transport damages.
