Now you can freely adjust the lighting according to your preferences

User's Guide

A28

Thank you for purchasing this product.

To use this product, please connect it to a power source.

Please use if the product works normally after connecting to power.

Introduction

The box is an intelligent controller.

It has 1 USB output port 1 Type-c port, and 2 socket outlets.

With 2 touch buttons, it can turn ON/OFF the light,

adjust the light luminance, and change light colors.

The lights can be controlled through both the touch buttons and a dedicated app.

Operation

This touch button is used to turn the light on/off, adjust brightness, and switch the color of the lights.

i. Single Click: Turn the light on/off.

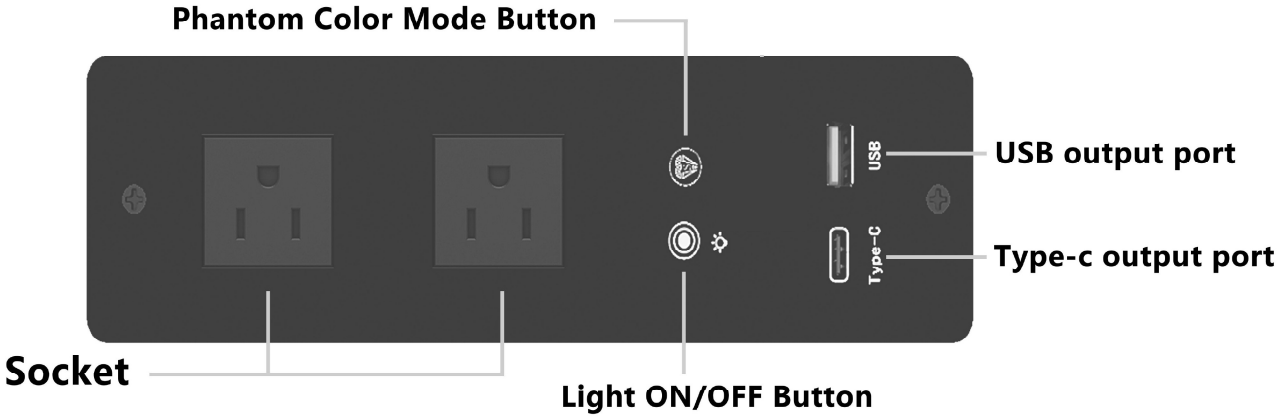

ii. Quick Double-Click: Switch between 7 static RGB colors.

iii. Long Press (2+ seconds): Adjust the light luminance.

This touch button is used to switch dynamic phantom colors .

Single Click:Switch to Phantom Mode, with 5 magical color transformations available.

⚠ ATTENTION PLEASE

1. If there is no touch response suddenly, Re-plug the power to reset the touch static electricity.

2. If you have any questions when installing, please feel free to contact us. Thank you.
