

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

Step A: Thread the wire (10) sequentially through the hanging rods (9, 8, 7), canopy (6), and secure it tightly to the light fixture bracket (11).

Step B:

- Connect the positive wire (marked with text) of the main line to the (+) positive output terminal of the (15) driver using the (14) wire connector.
- Similarly, connect the negative wire (marked with striped insulation) to the (-) negative output terminal of the (15) driver using the (14) wire connector.

Step C: Secure the (1) mounting plate to the junction box using the (3) screws.

Step D:

- Connect the positive input wire (black) of the driver to the positive power supply wire (+) using a wire connector (14).
 - Similarly, connect the negative input wire (white) of the driver to the negative power supply wire (-) using a wire connector (14).
- Notice: Ensure no bare copper wire is exposed to prevent electrical leakage.
- Use the (2) green screws to fasten the (4) fixture ground wire and the external ground wire to the (1) mounting plate.

Step E: Lift the entire fixture to align the side holes of the canopy (6) with the side holes of the mounting plate, then secure it with screw (5).

Step F: Tighten the glass shade (13) to the aluminum component (12).

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
