Cleaning and Maintenance

- Clean the furniture with damp cloth, rinse thoroughly. Dry frame parts completely. Do not use bleach, acid or other solvents on the wicker or metal parts.
- Inspect and tighten all **SCREW** on a regular basis to ensure proper performance and safety.
- In order to prolong the life and beauty of your product, we recommend storing it in a dry and protected area during off season periods.

The surface of wooden furniture can may become rough from exposure to rain water.

This is a normal occurrence which develops from the fact that the wooden fibres on the surface of the furniture stand up when they get wet. If this happens, you can lightly sand down the surface by using sandpaper and then reapply the oil to the affected areas. The original shape and color will be restored by doing this.

WARNING

Wood as a natural material intends to swell and shrink depending on its environment.

The wood will be damaged if the environment conditions change quickly and intensively (e.g. from rain to direct sun). Therefore it is highly recommended to cover or protect wooden products from rain, moisture and direct sun when not in use.
