

Fitting Instructions for Log Store

1. Your log storage unit will consist of

- 1 x roof
- 1 x roof baton
- 1 x back board
- 2 x side boards
- 6 x floor batons
- 1 x spacer
- 36 x screws plus spares

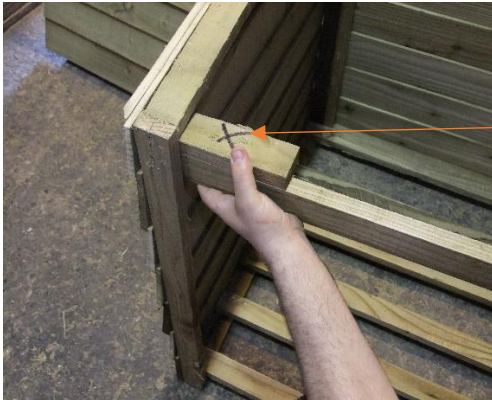

2. Fix the two side boards to the back panel using the 8 screws already in place in the back board

3. Place the 6 floor batons evenly spaced from front to back (please ensure front and back batons are as far forward and back as possible) as shown in the picture.
There are 4 screws for each baton 2 either side.

4. Using the spacer as shown in below diagram, screw baton into place using 4 screws provided. Insure the spacer (marked X) is inserted under the lip please see below diagram.

5. When attaching roof hinges ensure there is no gap, if needed pull down on roof and then attach hinge as shown in diagram
