

Installation steps for basic version of the planting box

1. Insert the side panel into the bottom slot and push it clockwise

2. Install the column in turn to connect

3. Install the waterproof strip and cover to complete the installation

4. Installation completion map

Installation steps for assembled version of the planting box

1. Two bottom boards aligned with the buckle, one board down to complete the docking.

2. Two bottom boards close together.

3. Remove the water blocking plate on the bottom board and install the water-passing parts so that the water in the two bottom boards can circulate.

4. Insert the side panel into the bottom slot and push it clockwise.

5. Install the columns and reinforcement strips.

6. Finishing with waterproof strip
