

SEBO AIRBELT E Series

Powerful, quiet and easy to use, the SEBO AIRBELT E models are great all round cylinder vacuum cleaners. The ergonomic handle grip makes it comfortable to use, whilst the soft AIRBELT™ bumper system protects walls and furniture. With a powerful motor, a unique Boost function and versatile cleaning heads, SEBO AIRBELT E vacuum cleaners are suitable for all floors.

Filtration

3.5L
Ultra Bag

SEBO Power Boost

The Boost function literally takes performance to a higher level. With a turn of the dial, the motor goes to 1200W to give a temporary lift in power for difficult cleaning tasks, such as picking up pet hair.

AIRBELT™ Technology

The patented AIRBELT soft bumper system protects walls and furniture against bumps and bashes whilst pulling the machine behind you. It also spreads the exhaust stream, preventing disturbance of surrounding air.

ErgoGrip Handle

The ErgoGrip handle is comfortable to hold due to its ergonomically sculpted form. Without the requirement to be held, the hose is designed for maximum airflow.

Power boost button and one touch cable rewind

Integrated Crevice and Upholstery nozzles

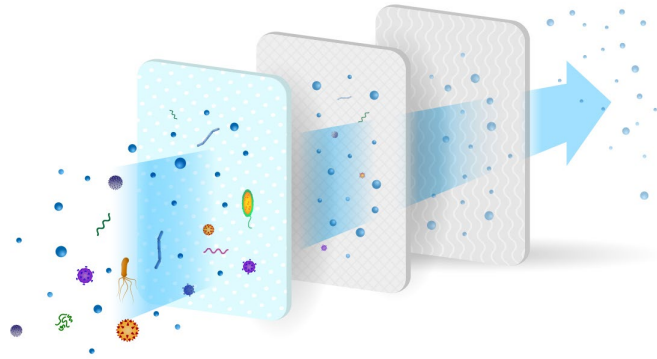

Easy rolling, non-marking castors

3.5L Ultra Bag for hygienic dust disposal

S-Class Filtration

SEBO filters give highly effective filtration and excellent airflow, by harnessing the power of electrostatic attraction. They let the air pass through easily, but literally pull the particles out of the airstream and hold onto them with their static charge. We regard this as the ultimate filtration technology.

To meet the S-CLASS standard the filtration system has to remove a minimum of 99.97% of particles of 0.3 microns. The SEBO S-CLASS system will remove 100% of particles of 1 micron and above.

SEBO AIRBELT E3 Premium

For premium performance, choose the E3 Premium.

The electric powerhead has a motor driven brush which lifts carpet pile and effortlessly removes pet hair. It has a low profile for reaching under furniture and an 'L' shape for cleaning under radiators and up to skirting boards. The brush roller can be removed easily for cleaning and there is also a trap door for easy access to the air path, in the case of a blockage. With the Boost function, cleaning performance is exceptional due to the combination of powerful brush action and high suction power.

Boost, variable power and powerhead on/off are all controlled from the handle grip for comfort and convenience. The Airbelt E3 Premium +BOOST is suitable for both carpet and hard floors and also comes with the SEBO Kombi professional cleaning head.
