

Installation of Buffet Island & Table

Putting together your

Buffet Island Potting Table

Here's all the information you'll need!

INFORMATION BEFORE WE BEGIN:

The Buffet Island & Potting Table is shipped in 2 pieces for easy shipping and installation.

*No tools are necessary for installation! No extra equipment necessary. No screws needed.

INSTRUCTIONS

Step 1: Remove from pallet and stand the bottom half of your table upright.

Note – We have already installed the bottom half of your table with castors.

Step 2: Lock the brakes on 2 wheels for a secure surface while completing installation.

Securing the top shelf to the bottom half:

Note – The top half of the table should be flush with the back of the table.

- ***The bottom half of the table is symmetrical. Therefore, it is your choice to pick which side is the back of the table, and which side is the front.***
- ***The top half of the table slides securely into the bottom half of the table.***

Step 3: With the top shelf upright, lift the shelf onto the bottom half of the table.

Step 4: Slide the support beams into place and you're done!

Note – No tools necessary! The support beams are made with a snug fit and will expand naturally with time creating a completely secured countertop.

Thank you for your order! With the proper care and maintenance, you'll be able to have your table for seasons to come!
