

4.Align the holes of the canopy with the screws on the mounting bracket, then tighten with M5 nuts. Installation complete!

INSTALLATION INSTRUCTIONS

NO.1018

Notes

1. This fixture is a large multi-light unit. To keep the LED color temperature synchronized across all lamp bodies, each switch toggle should last at least one second when using the wall switch.

2. If any differences in LED color temperature appear between lamp bodies, there is no need for concern, as this fixture is equipped with an automatic color temperature synchronization feature for quick recovery.

Please Scan the QR code to watch the installation video. If you have any questions, please feel free to contact us through the order page.

Warning!

1. Installation should be performed by a professional.
2. To prevent electric shock, please turn off the power before installing, repairing, or cleaning the light fixture.
3. This light fixture operates only within 110V-265V.
4. Do not install the light fixture in damp conditions.
5. Keep the light fixture away from acidic and corrosive materials.

Installation Steps

1. Align the U-shaped slots of the side blocks with the protruding threaded rods on the main body. Slide them into place, adjust until level, and secure tightly using M4 nuts and an M4 wrench.

2.Secure the mounting bracket onto the ceiling with provided screws.

Notes:
Note: The hanging wire length of this fixture is pre-set and not recommended for further adjustment. If the length needs modification, it can be shortened but not extended.

To adjust the hanging wire length, follow the method shown in the illustration. Press and hold the button with your finger , then pull the power wire to the desired height. Once adjusted, release the button.

3.Use the hook to hang the lamp body.
Turned off the power , connect the live and neutral wires from the power supply to the corresponding live and neutral wires of the lamp.
