

Dining Table Installation Instructions

1. Inspect the Package

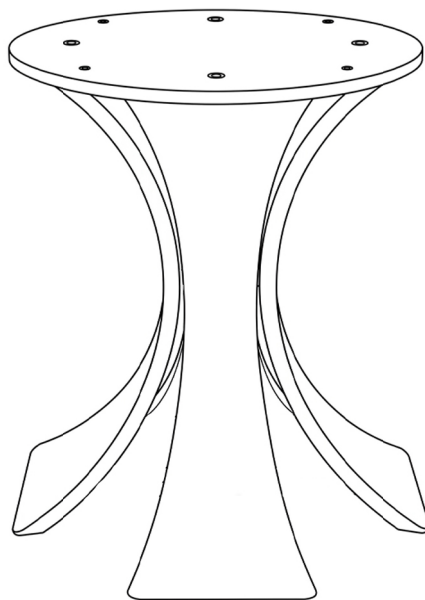

Tabletop

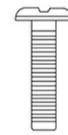

① _____

② _____

③ _____

base

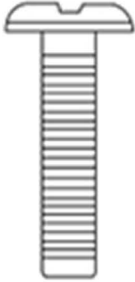

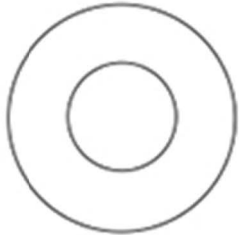

④

⑤

⑥

 ② screwdriver	 ④ screws	 ⑤ adjusting screws	 ⑥ screw washers
× 1	× 20	× 18	× 20

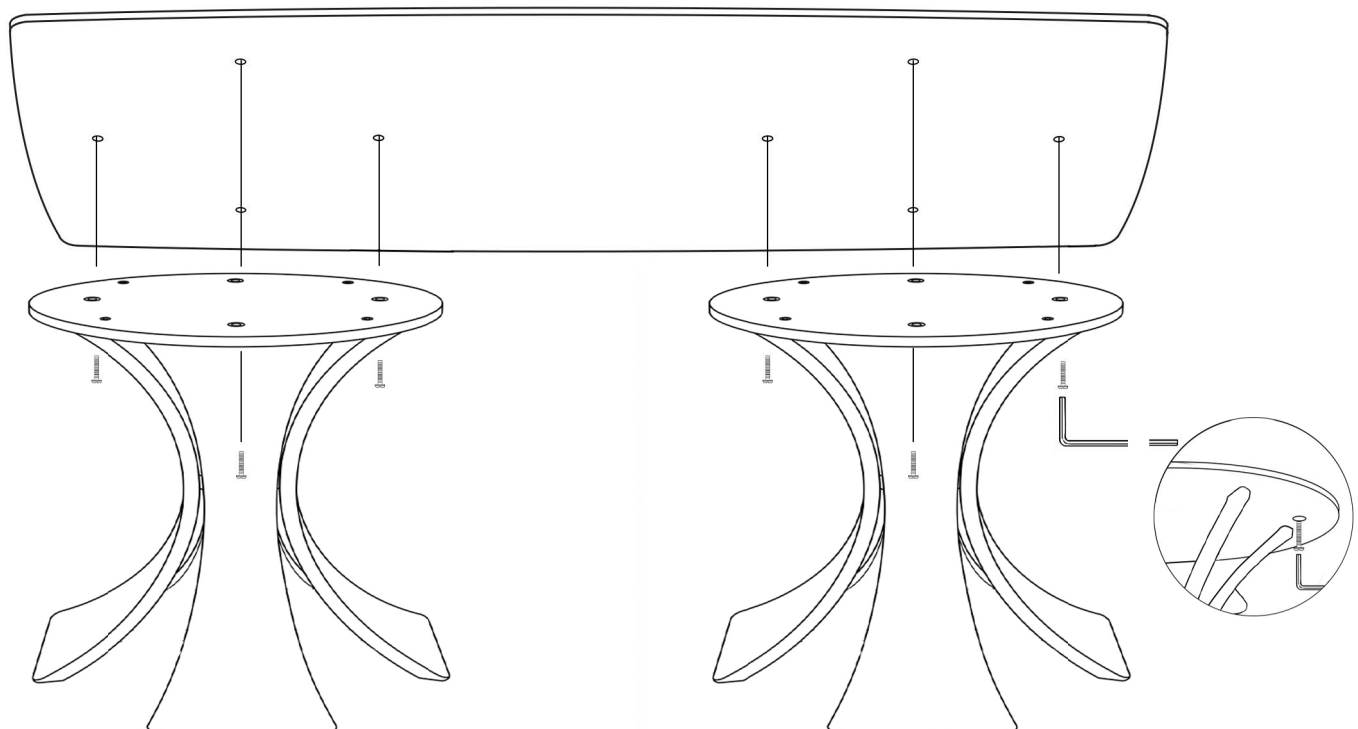

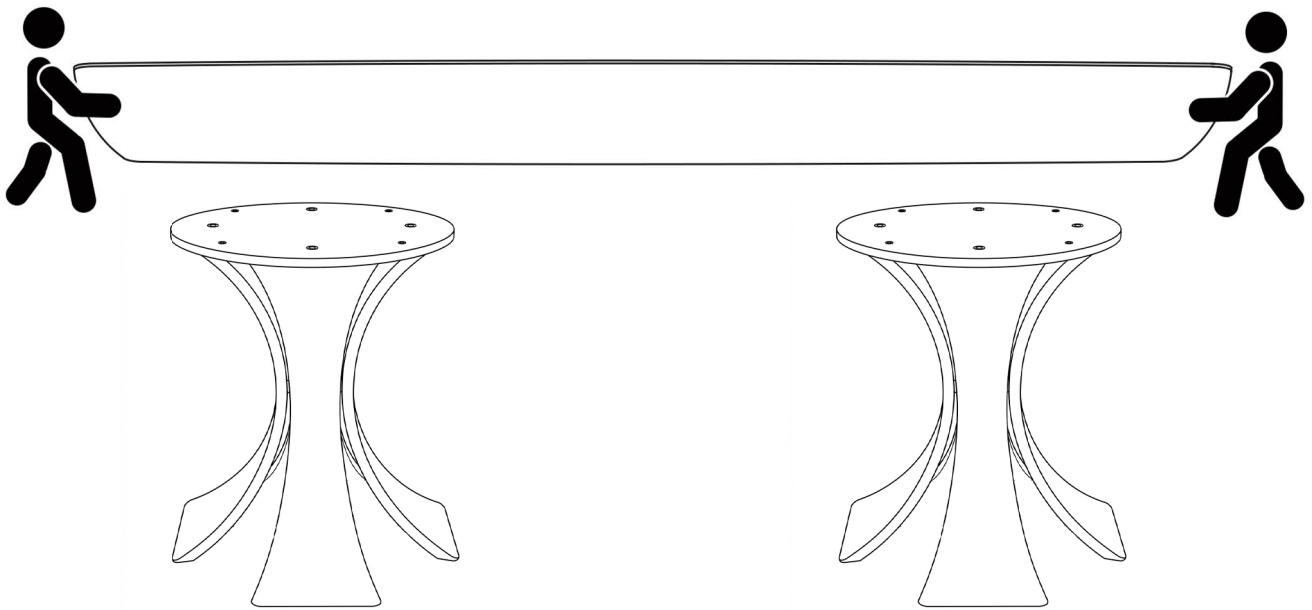

Upon receipt, first check whether the outer carton is seriously damaged. If there is no major damage, open the box and confirm that the tabletop, legs, and screw pack are complete and undamaged.

Step 1: Mount the Tabletop

With two people, carefully lift the tabletop. Gently place the tabletop onto the assembled base.

Slightly rotate the tabletop if needed to align the pre-drilled holes on the underside with the holes on the base.

Insert all tabletop fixing screws loosely. When all holes are perfectly aligned, tighten all screws gradually and evenly. Repeat for the second base assembly.

Important Safety Notes

1. The tabletop is extremely heavy. The entire process **MUST** be carried out by 2-3 people. Never attempt to lift it alone.
2. It is strongly recommended to move the tabletop to its final dining room position **BEFORE** assembly. Once fully assembled, the table is very difficult to move again.
3. When tightening screws, always do it gradually in several stages. Do not overtighten in one go, as this may crack the wood.
