ASSEMBLY AND INSTALLATION INSTRUCTIONS

Rack Assembly

- 1) If your rack is plated it is best to keep the tissue on during installation to avoid fingerprinting.
- 2) We recommend that you anchor your rack into the solid wood of ceiling joists or beams. Carefully measure the area where the rack is to be hung and install the ceiling screw hooks directly into the wood joists. If it is not convenient to hang your rack directly into wood joists you may use the included DRYWALL anchors enclosed with your rack. See Toggler® brand manufacturer recommendations for weight limits included in the instructions in the Toggler kit.
- 3) Suspend the offset hooks from the ceiling screw hooks and hang the bar from them.
- 4) Evenly space the pot hooks and your cookware along the bar. Hang your heavier items from the middle portion of the rack, between the offsets.

It is important that your rack is assembled correctly. If the unit is assembled or used incorrectly, it could become unstable and collapse, possibly causing injury.
