Energy Within Me 2

D2472S49526-4025

Energy Within Me 2 is a divided biomorphic abstract print that offers contrasting views of nature. The left side of the composition is clearly more abstract and features non-representational objects that appear to grow out from the center of the composition. A muted color scheme in slate grey, chestnut, and alabaster with a hint of khaki adds to the earthiness of the arrangement. The right side of the work features more objective forms. A bolder palette in cerulean, indigo, slate grey, and dark tan further delineates the structure of the objects.

A compelling work of art on textured paper, Energy Within Me 2 invites the observer to question and interact with its divided perspective. An original addition to the exclusive ART by TA Collection and a beautiful companion piece to Energy Within Me 1.
