

Assembly Instructions:

Untwist the tie on large flower. Take the small flower and carefully insert into the center of the large flower. You will have to push the fiberglass around to fit it in. Grab the black rod with the end cap and two spacers. Remove end cap and spacers. Push the tip of the pole through one hub of the large flower. Pick up a spacer and slide it on the pole as it comes through the large spinner. Take the small flower and slide onto the pole. As the pole slides through, take the next spacer and slide it on. Slide the pole through the front hub of the large flower. Finally, grab your end cap and fit it on the end. Make sure that the two spacers are between the hubs of the large flower and the hubs of the small flower. Take the second rod and insert it into the metal coupler. Made in China
Slide on the ground stake.

Note: For use in high winds we recommend applying a small amount of glue on the end cap. Be careful not to glue the wheel!
