Now you can freely adjust the lighting according to your preferences

Thank you for purchasing this product.

To use this product, please plug it into a 12V DC power supply.

Please use if the product works normally after connecting to power.

Introduction

The box is an intelligent controller. With 4 touch buttons, it can turn ON/OFF the light and turn ON/OFF the induction function, change light colors, and adjust the light luminance.

The lights can be controlled through both the touch buttons and a dedicated app.

This touch button is used to turn on/off the induction function.

A. touch this button once to turn on the induction function (indicator light on).

After the person leaves or remains stationary for more than 30 seconds, the light strip goes out; people and objects within a range of 1 meters move will light up the light strip.

B. Long press this button for 0.5 seconds to turn off the human body induction function (the indicator light goes out).

At this point, keep the light strip as it was before turning off and no longer be affected by human and object activities. By default, induction function is enabled when powered on.

This touch button is the Dynamic Phantom Color Mode, which includes 5 magical lighting effects.

Simply tap to cycle through the options. (Attention: This mode cannot adjust the brightness)

This touch button controls the single-color switching function of the light strips, offering 7 different colors to choose from.
