

WARNING

*This portable lamp has a polarized plug (one blade is wider than the other) as a safety feature to reduce the risk of electric shock. this plug will fit in a polarized outlet only one way. if the plug does not fit fully in the outlet, reverse the plug, if it still does not fit, contact a qualified electrician.

*Never use with an extension cord unless the plug can be fully inserted. do not attempt to defeat this safety feature.

CARE AND MAINTENANCE

*Unplug lamps before using any cleaning solutions. Dust shades with a feather duster or with an appropriate vacuum-brush attachment. Wipe with a soft, dry cloth and clean lamp bases with the methods appropriate to the material. Avoid the use of chemicals and household cleaners as they may damage the finish.

 <p>The diagram shows a lamp base (A) with a power cord attached. A lamp shade (B) is being pulled down towards the base. A screwdriver is shown at the junction of the shade and the base, indicating that the shade should be tightened. The power cord has a switch and a standard two-prong electrical plug.</p>	 <p>The diagram shows the lamp base (A) with the shade (B) attached. A socket (C) is visible on the underside of the shade. Two bulbs (D) are being inserted into the socket. A screwdriver is shown at the socket, indicating it should be tightened. The power cord with its switch and plug is also shown.</p>	 <p>The diagram shows the fully assembled lamp. The lamp base (A) is on the left, and the lamp shade (B) is on the right, connected by a power cord with a switch and a two-prong electrical plug.</p>
<p>Step 1: Pull power cord to connect the shade (B) to the Base (A). Screw the shade (B) onto the Lamp base (A). Be careful not to twist the power cord and tighten securely</p>	<p>Step2: Insert two bulbs(D) into the socket(C).</p>	<p>Step3: Put the light on a level surface to check if everything is stable.</p>
