This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

IMPORTANT SAFEGUARDS

WARNING: Read and understand this entire manual before operating or servicing this product. Failure to follow these warnings and instructions can cause personal injury or damage to valuable property.

- The product complies with relevant standards and regulations. Installation of this device must comply with all applicable regulations, and it should only be operated in well-ventilated areas. Please read the user manual before installing and using this equipment.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children shall not play with the appliance.
- Please properly keep product. Check whether the product is abnormal before use. If it is abnormal, please stop using it.
- Please use the product according to the intended use, warn of potential injury from misuse.
- Not suitable for environments with high humidity, explosive atmospheres, salt spray, acidic or alkaline conditions.

Installation precautions

1. Installation only according to these instructions. Improper installation can create hazards.
2. Keep the installation area clean and well-lit.
3. Keep bystanders out of the area during assembly.
4. Do not install when tired or when under the influence of alcohol, drugs, or medication.
5. Product capabilities apply to properly and completely installed products only.
6. For additional information regarding the parts listed in the following pages, please refer to the accessories package of this manual. Unwrap and separate all parts in a clean work area. Please keep small spare parts out of children's reach.
7. Do not use it near the fire. Use it after it is fully assembled.

8. Do not use excessive force when assembling or storing the product.
9. This product **MUST** be installed/serviced by a qualified service technician.

SAVE THESE INSTRUCTIONS

Thank you very much for choosing our product. Please read all the instructions before using it. The information will help you achieve the best possible results.

INTRODUCTION

- This product is used to turn your food waste into garden gold. It transforms kitchen and garden waste into rich, fertile compost. Ready-to-use compost will be yours in just 4-6 weeks; it's unique aeration system. Internal mixing bars speed up decomposition to make growing a happy garden easier than ever!
- Reduce your carbon footprint – Studies show that approximately one-third of the world's food supply goes to waste. But with VEVOR's rolling compost box, you can do your part to change that. Help the environment, and cook up some compost that your plants will love.

Year-round, hassle-free – Why should composting be a seasonal activity?

VEVOR's heavy-duty design lets you keep your compost going all year round! The sturdy side-locking mechanism ensures easy loading and unloading, while the durable construction maintains a tight seal.

Installation

- One person may install it with brief help from additional personnel. Use these instructions to ensure the correct installation function. And operation of product VEVOR Corporation reserves the right to modify appearances and specifications without notice.
- Installation and disassembly by two people is safer and easier. It is recommended to install it with the assistance of an assistant.
- These instructions suggest the best way to position the parts and barrel please follow as per the diagrams.

Take out the two panels and align the screw holes

Bx2

SCREW SIDE

Step2: Insert screws (S1) through the holes from the outside and tighten nuts (T1) on the inside. (Use a screwdriver and spanner if required.)

S1x3

T1x3

Step3: Connect the remaining panels together as per step 2

Bx4

S1x12

T1x12

3 x screws & nuts per
panel connection

Step4: Attach door frame to S1 x3 one side.
Secure with 3x screw & nut

Ax1

S1x3

T1x3

For the time being, do
not lock the door frame
and the last panel to
facilitate the insertion
of the divider.

Step5:

Cx1

Insert divider inside

Make sure match the arrows on both parts of "C" and the panels

Insert the divider into the groove at the center of each panel.(x6)

Step6: Clip door frame to remaining panel secure with 3 x screws & nuts

S1x3

T1x3

Make sure that the divider have been installed on all panels, including the positions between the guides on the door surround.

Step7: Place end cap on top and push down to clip into side panels.

Tip: You may find it easier if barrel is on the ground and use some body weight to push down.

Step7: Firmly push down on each edge to ensure panels are clipped in.

Ensure that all panels are securely connected to the end cover, and that all snap-in fasteners are fully inserted into the holes on the end cover.

Step8: Carefully flip barrel and repeat step 7 for other end cap.

Dx1

Ensure that all panels are securely connected to the end cover, and that all snap-in fasteners are fully inserted into the holes on the end cover.

Step9: Fix the end cap with four screws “S3”

S3x4

Step10:

Gx1

Hx1

R1x2

Jx1

T3x2

Before operation, please ensure that the handle "J" can rotate freely within the housing "G".

Step11:	 K1x1	 K2x1	
 R2x1	 T3x1	 K3x1	 K4x2

**INSERT PART “K3”
INTO PART “K1”**

**Be attention
of this side up**

Step12:

Step13: Slide axle into barrel assembly.

Lx1

Tip: Compress silver button as it's pushed when through the hole in each part.

Step14:

S2x4

T2x4

Step15: Attach handle assembly onto axle as shown.

IMPORTANT NOTE

The axle has a spring pin in both sides. It is crucial that the pin is fully locked into the side plastic parts for gear to work.

Step16:Installation of the slider component.

Qx1

IMPORTANT

To ensure the normal operation of the gear, this pin must be fully inserted into the side plastic component.

Step17:

Insert the two leg components and rotate them synchronously to align and connect together.

Step18:

Repeat the previous step and install the leg components on the other side.

Step19:

Place the component upright. During the process, be careful to hold the rotating disc clamp handle.

Step20:

Px2

S2x8

T2x8

Step21:

Ex1

Fx1

Ux1

Slide door components into the main barrel assembly as shown.

Sliding doors are interchangeable

Integrated air vent can be opened or Closed.

Tip: If mixture is too wet it is recommended to open vents.

To keep door closed a peg, clip or padlock can be used (not supplied)

Unlocking the ratchet allows the barrel to rotate freely.

WARNING: It is recommended to keep ratchet engaged as otherwise the barrel and handle can spin back and cause injury.

How to compost

Here, we recommend you how to compost.

1. Collect some of the waste generated in your daily life, such as apple peel, banana peel, vegetable leaves, egg shells, etc.

Pour them into the composter.

2. Add garden dead leaves even scraps of paper, you don't need to care about the proportion of green organic matter is how much, but the best effect is (25-30) : 1. You can also add some bran, which is more effective for fermentation of the compost.

3. Add some clean water to the mixture to make it easier to ferment when they become moist, rotate the composter make them mix, Internal mixing bars aerate material while turning to help accelerate decomposition. When composting, place a basin under the compost machine to receive the liquid from the composter, which can be used to water the trees and flowers in your garden.	 
4. Ready-to-use compost will be yours in just 4-6 weeks. The compost is done when it's dark and crumbly with an earthy smell.	

Caution:

- Check that the compost is slightly damp, and add water when needed.
- Turn the compost 5-10 rotations at least 2-3 times a week.
- Aerating vents help promote fast composting with air flow as needed.
- Empty the compost into a bucket, wheelbarrow, or tarp.
- Use the compost in your garden.
- Do not compost with grass and leaves that have been sprayed with insecticide.
