Installation

Step 1

Unpack all parts from cartons carefully.
Connect the tubes(H) together to get desired length, and screw the top end into the quick link (I) beneath the canopy, the bottom end to the fixture loop on top of lighting frame(K).

Fix the lighting frame(K) to the fixture with screw.

*Note: When parallel wire(SPTI&SPTII)is used. The neutral wire is square shaped and ridged and the hot wire will be round in shape and smooth.(See illustration on left)

Grounding Instructions:

- a) For installation in the United States: Wrap ground wire from outlet box around green ground screw on mounting bracket, no less than 2" from wire end. Tighten ground screw. If fixture is supplied with a ground wire, connect to outlet ground wire with a wire connector.
- b) For installation in Canada: If fixture is supplied with ground wire, wrap ground wire around green grounding screw on mounting bracket. Tighten ground screw.
