

ELECTRO MAGNETIC LEVITATION GLOBE

OPERATION INSTRUCTIONS

This is absolutely magic and fascinating experience for your purchasing choice,. With some exact operation, the globe will conquer the gravity of the earth and levitate in the midair.

- Please place the levitation device on a absolutely horizontal surface. If the surface is not flat and level, the globe can not levitate normally
- Switch on the power
- Hold the globe with two hands and put the globe vertically over the center of the base.
- Make the globe approach gradually and vertically towards the center of the base.
- When you feel a strong force which is holding the globe from the base, this position is the levitation place which is 12mm-15mm over the base. At this moment, please release the globe gently
- This 12mm-15mm over the base is the levitation distance

CAUTIONS

- **Please assure the place where the levitation device is put is far from away other magnetic fields, such as computer, or other electronic device, etc. Otherwise the globe can not levitate normally**
- Do not drop the globe on a hard surface, otherwise the globe or the magnet inside the globe will be damaged
- Please assure the magnets inside the globe is in its position. There is only one magnet inside the globe. If the magnet is not in its position, the globe can not levitate normally
- **THIS IS NOT A TOY AND IT IS NOT SUITABLE FOR THE CHILDREN UNDER 12 YEARS OLD.**
- **FOR INDOOR USE ONLY**
