Base Type: E12

Light Source Included: NO

Voltage: 120VAC

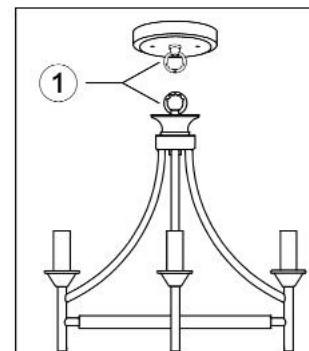

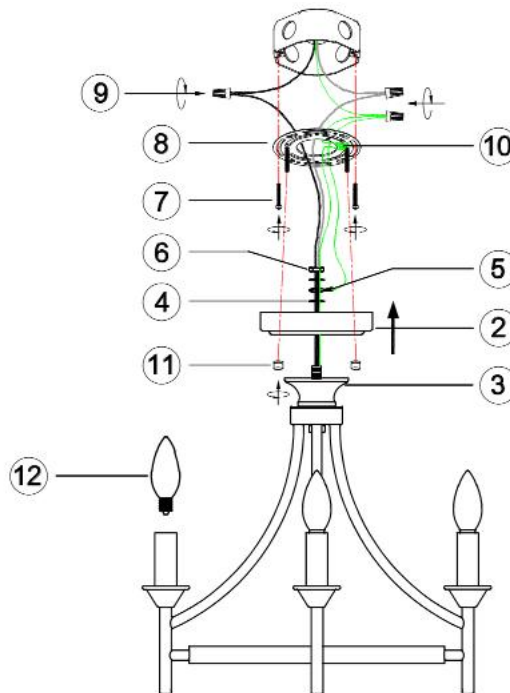

Wattage: 60W

Package includes

1 x Chandelier Light

1 x Accessories Kit

1 x User's Manual

Flush Mount Light Installation Instructions

1. Remove the hanging rings from the light fixture body and canopy. Cut the central wire to an appropriate length (recommended: 20cm for power wires, 23cm for ground wire), then strip the wire ends again.
- 2-3. Thread the center wire through the ceiling plate and position it at the decorative cover on top of the fixture. Thread the canopy over the central wire and place it on ceiling light decorative cover.
- 4-6. Thread the washer, ground wire, and hex nut through the center wire to the canopy, then tighten the hex nut with a 14mm wrench.
- 7-8. Attach the mounting plate to the electrical junction box using supplied mounting screws.
9. Connect the main wire (live wire and neutral wire) to the corresponding reserved wires in the junction box by using the wiring caps.
10. Use the green grounding screw to secure the ground wire from the light fixture to the mounting plate. Then, use the twist-on wire nut to connect the ground wire inside the junction box. Carefully place all wires back into the junction box.
11. Secure the ceiling canopy (Item 2) to the junction box using decorative nuts (Item 11).
12. Assemble the bulbs (not included).

Note: please use this product accordingly to its intended purpose, do not retrofit or remodeling the product. The warranty does not cover if the failure is caused by the third party product, or natural disasters.
