

Measure Before You Order.

Are Your Walls Plumb?

It is essential your shower enclosure is tiled before ordering as your measurements **WILL** change once tiling and grout are in place.

Take 3 tile to tile measurements:

1. **TOP** of glass height (78")
2. **MIDDLE** from threshold (39")
3. **BOTTOM** at threshold

- These enclosures are available in $\frac{1}{4}$ " width increments.
- If minimum measurement falls outside of a $\frac{1}{4}$ " increment, order the closest $\frac{1}{4}$ " below your minimum measurement.
- **DO NOT** order a model that is larger/wider than your absolute minimum width measurement. Shower model will not fit.
- If your walls are $\frac{1}{2}$ " or more out of plumb, please contact us before ordering.
