

We're Here to Help

Improved Packaging:

We now use thicker cardboard and extra protective film, with fragile labels clearly placed on the package. If your item is damaged during shipping, just send us a photo, and we'll help resolve it quickly.

Safety First:

If you hear anything loose or broken when receiving the package, please carefully open the outer box and take a photo. Fragile items are sealed inside a protective layer—please do not remove it to keep everyone safe and make returns easier.
