

TABLETOP ETHANOL FIREPLACE

ASSEMBLY | USE | SAFETY INSTRUCTIONS

1. INCLUDED PARTS

STAINLESS-STEEL DISH

BURNER CUP

FOLDING SNUFFER

2. ASSEMBLY & USE

INSERT THE BURNER CUP

Place the burner cup securely into the center opening.

ADD FUEL

Carefully pour bioethanol into the burner cup. Wipe spills at once.

IGNITE

Use a long lighter to ignite the fuel from a safe distance.

INSTALL THE GLASS

Lower the glass cylinder straight onto the base.

EXTINGUISH

Cover the flame completely with the folding snuffer.

OPTIONAL CANDLE USE

Place a suitable candle in the stainless-steel dish.

IMPORTANT SAFETY INFORMATION

ATTENTION

Read all instructions before lighting or using the fireplace.

1. Place the unit on a flat, stable, level, heat-resistant, and non-combustible surface.
2. Use only in a well-ventilated area. Keep flammable materials at least 1 meter (3.3 ft) away, and keep the unit away from drafts, fans, and air-conditioning vents.
3. For adult use only. Keep children and pets away from the unit, fuel, and open flame.
4. Use only the approved bioethanol fireplace fuel and maximum fill volume specified on the product label. Never use gasoline, rubbing alcohol, or other fuels.
5. Wipe up spilled or splashed fuel immediately. Do not ignite until all fuel residue is removed and the surface is completely dry.
6. Move the closed fuel container well away from the unit before ignition. Use a long lighter and keep your face and hands away.
7. Never leave the fireplace unattended while burning. Do not touch or move it while burning or hot; the glass and metal surfaces become extremely hot.
8. The flame may be difficult to see. Confirm that it is completely extinguished before approaching, touching, or refilling the burner.
9. Never add fuel while the unit is burning or hot. Allow the unit to cool completely before refilling.
10. Use only the supplied flame snuffer to extinguish the flame. Do not use water.
11. Do not use the product if the glass is cracked or any component is damaged. Do not use it for cooking or heating food.

WARNING

EXTINGUISH ONLY WITH THE SUPPLIED SNUFFER.
NEVER ADD FUEL WHILE THE UNIT IS BURNING OR HOT.
NEVER USE A CANDLE AND BIOETHANOL FUEL AT THE SAME TIME.
