

Start Assembly

1. Take out the right side support frame and door catch, install with small screws

Align the Grooves

2. Take out the large shelf panel and install with large screws (the side with holes faces outward)

3. Take out the small shelf panel and install with large screws

4. Take out the door panel and door pad, install with small screws

5. Insert the door pins into both ends of the door panel

6. Take the assembled door panel and snap the door pins into the grooves of the large shelf panel

4. Turn the frame over

5. Insert the back panel along the grooves

6. Take out the left side support frame and install with large screws
