Assembly Guide

STEP 1

STEP 2

STEP 3

STEP 4

STEP 5

STEP 6

STEP 7

TIP: Note that there is an LED strip connector on both the K board and the G board, and they need to be firmly inserted, There are two heating element connectors under the base plate that need to be firmly inserted.

STEP 8

STEP 9

STEP 10

TIP: The DUST-PROOF BOARD comes pre-installed on the top panel with screws. When you receive the product, loosen the screws and remove the DUST-PROOF BOARD.

STEP 11

STEP 12

TIP:

Please thread the cable through the cover plate and connect it as shown in the diagram. The diagram shows five black heating element connectors, a white LED strip connector, and a blue network cable connector that need to be threaded upwards onto TOP board.

TIP2:

Insert the TOP board downwards (at the four inner corners of the bottom)

all the way in. If needed, you can use four 4x40mm screws to reinforce the

stability of the top and wall panels from the Top-board (at the four inner corners of the top). Generally, no screws are needed.

Heating element connector diagram

Tip1: Wiring instructions

- ① One end of the LED strip / network cable / thick black heating element connector is already inserted into the controller. You need to find the other end and connect it to the connector.
- ② Speaker wire / reading light wire / temperature control wire – First, locate both connectors and insert them, then insert the other end into the controller. Note: The controller has instructions on connector locations.

Tip2: Line color description

- ① White-Blue wire - Reading light wiring (4-pin connector) .
- ② Green-Green/Purple-Purple wire - Speaker wiring (6-pin connector) .
- ③ Blue wire - Network cable.
- ④ Pure White wire - LED light strip wiring.
- ⑤ Thin Black wire - Temperature control wiring

STEP 14
