

**ASSEMBLY INSTRUCTIONS**  
**621-870 ROUND DINING TABLE**

1. Set Top upside-down on a non-marring surface. Place Base onto Top so that holes in Base Bridgeplate align with holes in Top Bridgeplate.
2. Use provided Wrench to attach bridgeplates together with (4) Flat Washers, (4) Lock Washers, and (4) 5/16" x 2" Bolts. Tighten securely.
3. Return assembled table to its upright position.

**Leaf Installation:**

1. Pull out all leaf supports.
2. Lay (1) leaf panel on supports. Center leaf so that both supports are same distance from each end of leaf.
3. Each leaf has a number stamped on the bottom on the ends. The numbers should be matched as the leaves are assembled to ensure a correct fit. Find the leaf that has a number corresponding to the number on one end of the first leaf you just installed and place it beside the first leaf so the numbers match.
4. Connect (2) leaves together by sliding hole on end of one leaf onto tenon on end of other leaf. Make sure table lock, underneath where leaves connect, is locked.
5. Continue installing the remaining leaves until all are in place.
