INTRODUCTION

Thank you for choosing our products. Please read the instructions carefully and keep them for future reference. If you need further assistance, please contact our customer service online via email.

PRECAUTIONS

1. When installing the product, use a soft underlay (such as carpet or cardboard) to avoid scratching or damaging the surface of the product.
2. Please try to use a manual screwdriver instead of electric screw driver. A manual screwdriver can be used to better control the tightness of the screws.
3. Do not use any glue.
4. The product is unstable before it is assembled. Please pay attention to the product installation sequence.
5. The structure of this product can not meet the requirements of the placement of heavy items and children climbing.

WARRANTY

We provides an **18 Month** Warranty on all products starting from the date of original purchase. If the product has any manufacturing defect, please contact customer service via email with your order number and other details to the problem. We will send you further information about the return or exchange.

The ways to adjust the door

- Before adjusting the hinge, please check whether the cabinet is skewed.
- If the skew can not be repaired, adjust the cabinet to vertical position.
- Please adjust the hinge with the door open.

Obvious gaps between doors or Doors don't look closed  Have gap	1 Turn "internal & external screw" to the right can make the door approach inside. Please adjust the doors little by little. Top  Turn right Bottom  Turn right The left door  Top  Turn right Bottom  Turn right The right door  * If the 2 doors are overlap, please turn the "internal & external screw" to the left.		
When door is crooked  Have gap	1 Rotate the "front and rear screws to the left." Top  Turn left Bottom  Turn left *After adjusting the "front and rear screw", the door still does not change, please turn the "internal & external screw" to the right slightly.	2 Push the door to the cabinet. 	3 Rotate the "front and rear screws to the right." Top  Turn right Bottom  Turn right
When door is leaning  Overlap Protruding to the underside	Turn "internal & external screw" to the left can make the top of the door tilted outward. Top  Turn left Bottom  Turn left 	Protruding to the upside  Overlap	Turn "internal & external screw" to the left can make the bottom of the door tilted outward. Top  Turn left Bottom  Turn left 
When the door is higher on top  Have gap	1 Turn "up & down screw" to the left. Top  Turn left Bottom  Turn left	2 Lower the door's height so that 2 doors are of the same height. 	3 Turn "up & down screw" to the right. Top  Turn right Bottom  Turn right *If the door is lower on bottom, please lift up the left door slightly on step 2.
