Assembly Instructions

1. Prepare working area
Open the carton on a flat, clean floor or directly on your bed frame. Do not use sharp knives when opening the box, to avoid slicing the mattress fabric.
2. Take out the vacuum-sealed mattress roll
Pull the rolled, vacuum-compressed mattress out of the shipping box. Place it flat on the bed frame.
3. Cut the vacuum plastic film
Carefully snip the vacuum packaging. Once the seal is broken, the mattress will immediately start expanding.
4. Unroll the mattress
Unroll the mattress fully across the bed frame. Adjust its position, align four corners with the bed frame.
5. Allow expansion & ventilation
Leave the mattress unobstructed. It will gradually inflate to its full thickness.Please allow 24 ?48 hours for the mattress to finish expanding completely. Minor new?product scent will dissipate during ventilation.
6. Final check
After full expansion, verify that the mattress lies flat without sagging or overhanging. It is ready for sleeping.

Important Safety & Usage Notes

- Sharp tools may permanently damage mattress foam; exercise extreme caution while removing packaging.
- Do not place heavy items on the mattress during the expansion period.
- Use indoors only, keep in dry and well?ventilated surroundings.
- It is normal that the mattress cannot reach full height instantly after opening.
