Attention

1. Please check that you have received all the parts as shown in the parts list diagram. If not, contact us directly through the online platform you purchased from.
2. Assembly step by step. Feel free to contact us if you see any missing parts, or have any trouble with assembly.
3. We recommend to assemble with 1-2 people.

FAQ

1. The support beam is not uniformly aligned. What do I do?

   Please check that you have aligned holes from both vertical beams correctly from the same height, and install each layer of support beams with ample storage space.

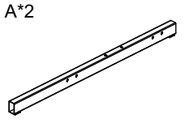

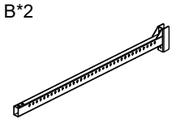

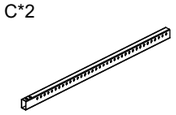

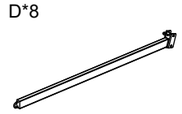

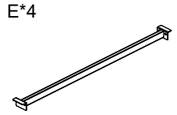

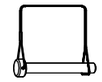

2. Missing screws, bolts, latches etc.

   Please check your local hardware stores for any small missing parts. If there are no such stores in your local area, then reach out to us through the online platform you purchased from.

3. Can I use this other than kayak storage?

   While our storage rack is primarily designed for kayak storage, you may store other items such as ladders, wooden boards, paddle boards etc. Please refer to the maximum weight capacity on our product listing.
