Accessory List

Bottom Tier Board Hole Description

Bottom Tier Board Front

- Red ring hole for mounting the foot stick
- Blue ring hole for inserting the bolt

Installation Steps

1. Take out the bottom tier board and the foot stick and install them with large screws.

The foot stick should face outward uniformly.

2. Install the remaining foot sticks in the same way

3. Take out the side stand left and install it with large screws. (Note alignment of tier board and side stand notches)

Door suction with metal plate facing outwards

4. Take out the side stand right as well as the door suction, and install the door sucker with small screws at the back.

5. Then fasten the side bracket right to the bottom shelf with large screws (Note alignment of tier board and side stand notches)

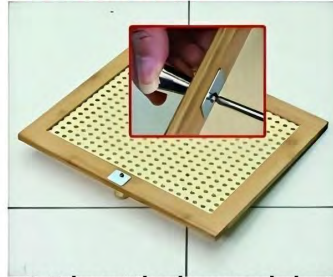

6. Remove the back plate and insert it along the side bracket grooves.

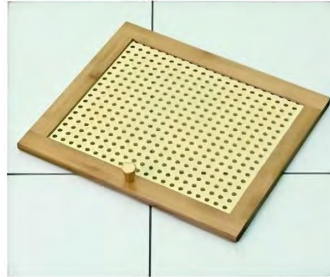

Leave the front screws on for now.

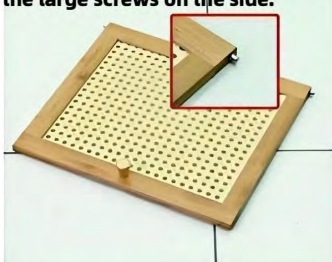

7. Remove the groove on the back of the top tier board and snap it into the back plate, then screw in the large screws on the side.

8. Take out the door panel, door gasket, and door handle and install them with flat head screws.

9. Door panel with fitted door handle.

10. Remove the door bolt and insert it into the ends of the door panel.

11. Insert the bolts in the door panels aligned with the holes in the bottom tier board and top tier board as shown in the picture.

Then screw in the large screw at the front.
