

HOW TO MEASURE - 2" FAUX WOOD BLINDS

Blinds Actual Width is $\frac{1}{2}$ shorter than width size ordered to account for mounting brackets allowances.
For example: order 23" width, you'll receive 22.5" width.

INSIDE MOUNT

- Width: **Smallest** of inside framed width (w1, w2, w3). Round down the nearest width when ordering.
- Height: **Largest** of inside framed height (h1, h2, h3). Choose the height that matches or exceeds the window length.
- Depth: **2.7"** required. Ensure no obstacles.

OUTSIDE MOUNT

- Width: Include window trim and **add 1.5" on each side**. Round up the nearest width when ordering.
- Height: Include window trim and **add 3" on top, 1" on the bottom**. Choose the height that matches or exceeds the window length.
- Minimum **3"** flat surface above the window required.
