

THEODORE ALEXANDER

In the Shade 2

D2195S43888-3538

In the Shade I presents an exquisite close-up composition of palm fronds that command the picture plane. The curves and lines of the leaves create a sense of movement and depth while texture is brought forward through the delicate vein pattern of the leaves. The soft, muted shades of green lend organic beauty to the image.

Depth is found throughout In the Shade 1's shaded leaves and perceived offering of cover. A superb addition to the carefully curated ART by TA collection.
