

Memory Wall Clock 625632

A unique digital wall clock, this clock is designed to help people suffering from memory loss or dementia, poor or impaired eyesight, or those who have a hard time comprehending abbreviated words.

Unique Display: More than your average timepiece, this digital wall clock displays the time and clearly spells out the full day of the week, month, and date in oversized, bold letters. A second display option simply shows the day of week and period of the day — morning, afternoon, evening, or night.

LED-Backlit: The Memory alarm clock features a non-glare LED-backlit display that automatically adjusts display brightness in day and night mode. Time display can be set to 12- or 24-hour format and has eight different language options: English, Spanish, French, German, Italian, Polish, Dutch, or Welsh.

Wall-Mount or Tabletop Use: This unique LED clock may be wall-mounted or displayed on a tabletop by using the built-in foldable easel stand.

Quality Finish: The injection-molded case on this clock is finished in satin silver on the front and black on the back, creating a simple but aesthetically pleasing design.

AC Powered: This digital clock features AC powered time only and includes UL listed AC power adapter.

Howard Miller: Founded in 1926 and still family-owned in its third generation, Howard Miller is the world's leading clock company and a respected brand name in fine specialty furnishings such as curio cabinets, wine & bar furnishings, custom storage cabinets, and SmartMoves® adjustable height desks.
