

THE RADIANTLIGHT Mounting Instructions

Stake Mounted Option Installation

You will get 4 stakes, 4 locking screws, 1 TedStuff tightening wrench, to attach landscape spikes to fixture. This will turn your Deck Mounted light into a landscape spike mounted light so you can install it in the Earth.

Position stake as pictured and line up holes.

Install locking screw.

Use wrench provided to tighten locking screw.

Attached the 2 wires from RadianLight the to your new or existing 12 to 15 volt low voltage lighting systym wire.

Bury the wire and position in place.

You can push down into place from the topper. Be careful to push down the sides over the mounting screws so the cover will net bend - or buy gripping the sides of the light to push down.

Level in place.

Fill in the soil, mulch, or rocks, etc. and enjoy.
