This report is governed by, and incorporates by reference, the Conditions of Testing as posted at the date of issuance of this report at http://www.bureauveritas.com/home/about-us/our-business/cps/about-us/terms-conditions/ and is intended for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. Measurement uncertainty is only provided upon request for accredited tests. Statements of conformity are based on simple acceptance criteria without taking measurement uncertainty into account, unless otherwise requested in writing. You have 60 days from date of issuance of this report to notify us of any materia error or omission caused by our negligence or if you require measurement uncertainty; provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents.

Received Date: November 12, 2024 Report Date: December 13, 2024

#### ADDITIONAL TEST RESULTS FOR 12 DRAWER DRESSER

		-UK 12 DRAWER DRESSER		
- Interlock Requirement	F2057-23 Sec 4.6 & 9.1	extendible element Interlocks shall not require consumer assembly and/or installation if the unit is shipped assembled, except as allowed in 4.6.1.1. Consumer assembly and/or installation of interlock components as part of the normal consumer assembly process is allowed for items shipped/sold unassembled. When tested to 9.1, the extendible element shall be considered interlocked to the open extendible element if either: (1) it remains closed during the test and is functional after tested extendible element is closed; or (2) its opening acts to close the extendible element originally open.		
Clothing storage units - Stability Test - Simulated Clothing Load	16 CFR 1261 / ASTM F2057-23 Sec 9.2.1/ASTM F2057-23 Sec 4.1,4.2,4.3	If 50% or more of the storage volume is extended, determine the weight for loading the extendable elements and/or space behind the doors based on the volume calculated in Section 5.4. Load per Section 8.3. 3. If less than 50% of the storage volume is extended, the unit shall remain empty. Open all doors and extend all available extendible elements in accordance with Section 8.1.3. Elements shall remain open for 30 s.  The unit shall not tip over during the test	М	PASS
Clothing storage units - Stability test - Simulated Horizontal Dynamic Force	16 CFR 1261 / ASTM F2057-23 Sec 9.2.2/Sec 4.1,4.2,4.3	Open all doors and all available extendable elements Apply 10 lbf (44 N) horizontal force, parallel to the direction of outward motion at the highest hand hold height, not to exceed 56 in on the extended element most likely to cause tip over This can be on an extendable element or door handle, whichever is highest, but not exceeding 56 in The unit shall not tip over during the test	М	PASS
Clothing storage units - Stability test - Simulating a Reaction on Carpet with Child Weight:	16 CFR 1261 / 16 CFR 1261 / ASTM F2057-23 Sec 9.2.3/Sec 4.1,4.2,4.3	Place the Test block(s) under the unit's most rear floor support(s), such as a leg, foot or upright Open all doors and all available extendable elements Gradually, over period of 5 seconds, apply the test apparatus with 60lb over the top of the door or extendable element most likely to cause tipover. Allow to rest without support for 30 seconds The unit shall not tip over during the test NOTE: Conduct multiple tests if it is not clear which element is most likely to cause tip over	М	PASS
Clothing storage units - Permanency of Labels and Warnings - Paper	16 CFR 1261 / ASTM F2057-23 Sec 9.3.1	A paper label shall be considered permanent if, during an attempt to remove it without the aid of tools or solvents, it cannot be removed, it tears into pieces upon removal, or such action damages the surface to which it is attached.	М	PASS
Clothing storage units - Permanency of Labels and Warnings — Non-Paper	16 CFR 1261 /ASTM F2057-23 Sec 9.3.2	A non-paper label shall be considered permanent if, during an attempt to remove it without the aid of tools or solvents, it cannot be removed or such action damages the surface to which it is attached. #### COMPOSITE WOOD SAMPLE **DECLARATION FORM EPA TSCA TITLE VI** CARB §93120 ATCM SOR/2021-148 FOR FORMALDEHYDE

CPSD-GB-08616.01-FORM Version No.: 6 Business Line: GB

#### Section D –Regulated Composite Wood Details:

wood is present in the sample as declared in Subsections B1, B2, and/or Section C. Upon completion of this section,

Panel Types and Emission Limits Reference:
Hardwood plywood (HWPW) ≤ 0.05 ppm
Medium-density fibreboard (MDF) ≤ 0.11 ppm
Thin medium-density fibreboard (Thin MDF) ≤ 0.13 ppm
Particleboard (PB) ≤ 0.09 ppm
Laminated product ≤ 0.05 ppm

Examples of resin type include but are not limited to:

No-added formaldehyde-based (NAF) resin
Ultra low-emitting formaldehyde (ULEF) resin
Phenol-formaldehyde resin

Component of sample where composite wood is found:	Panel Type:	Emission Limit Met (ppm):	Resin Type:	Mill Name:	TPC Name:	TPC #:
