

Following these mounting instructions to support wall mounted installation.

Tools You May Need

Drill

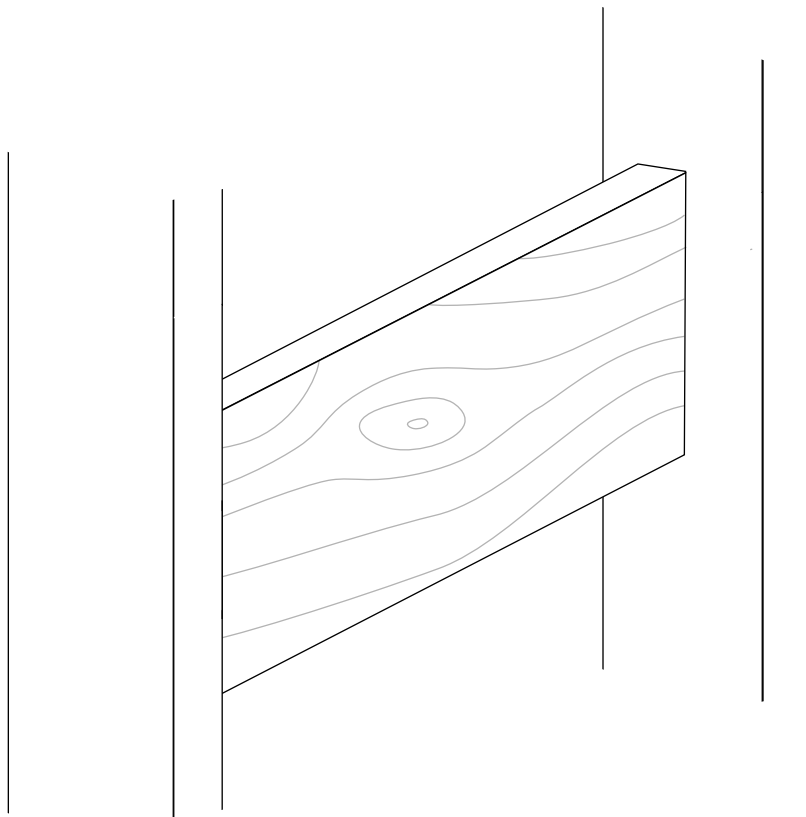

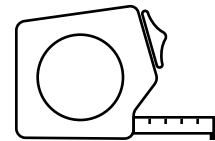

Level

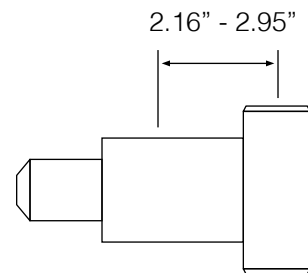

Hex Key

Tape
Measure

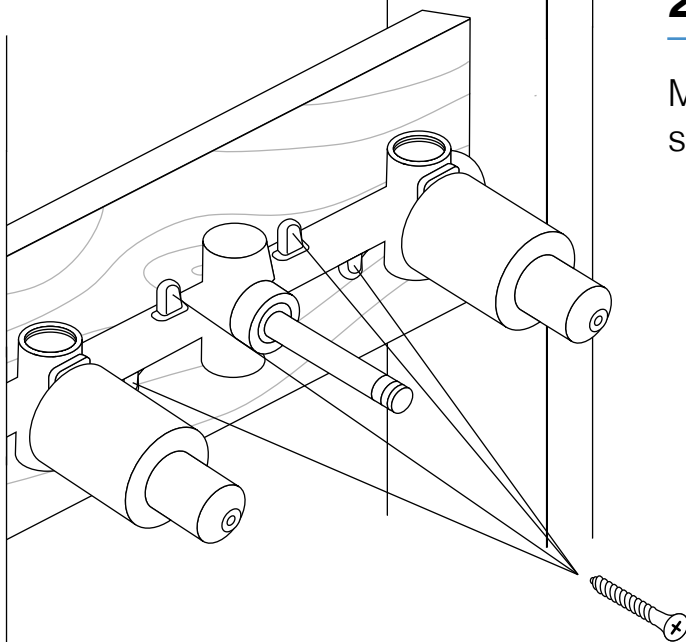

1. Add Blocking

Add blocking between studs to mount rough-in valve. Center of inlets to finished wall surface can have max 2.95" and min 2.16".

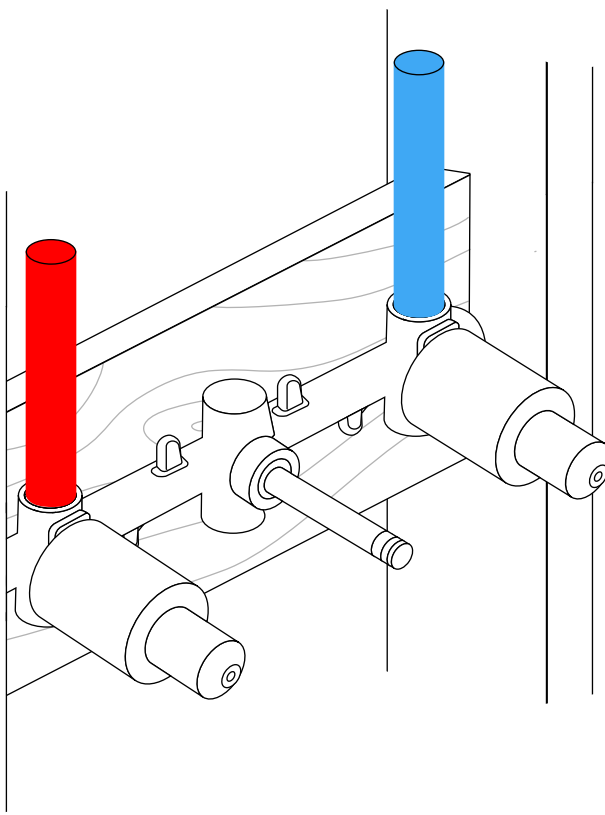

2. Mount

Mount rough-in valve with screws. Check for level.

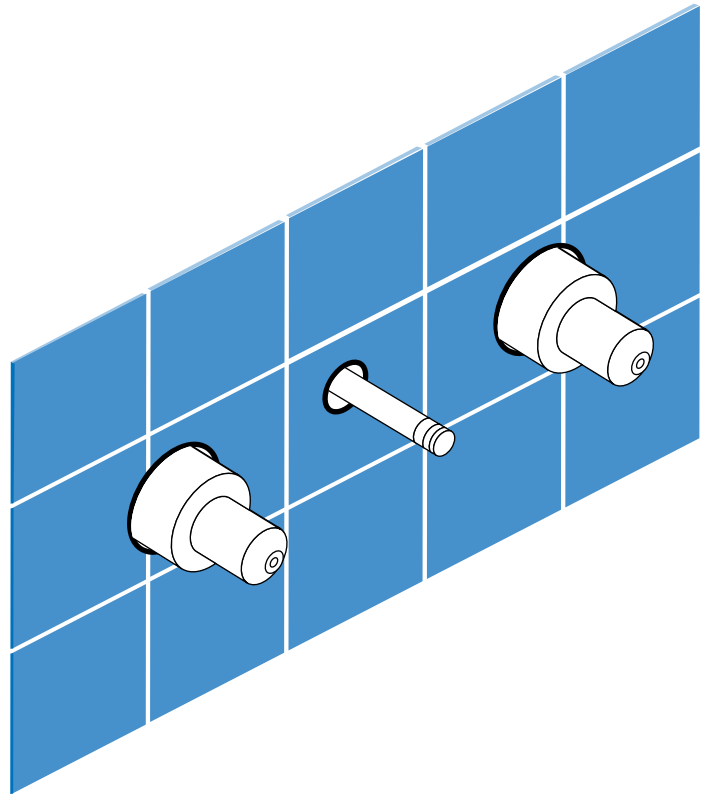

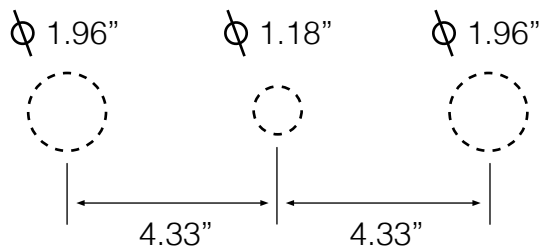

3. Connect Inlets

Connect the hot and cold inlet pipe lines.

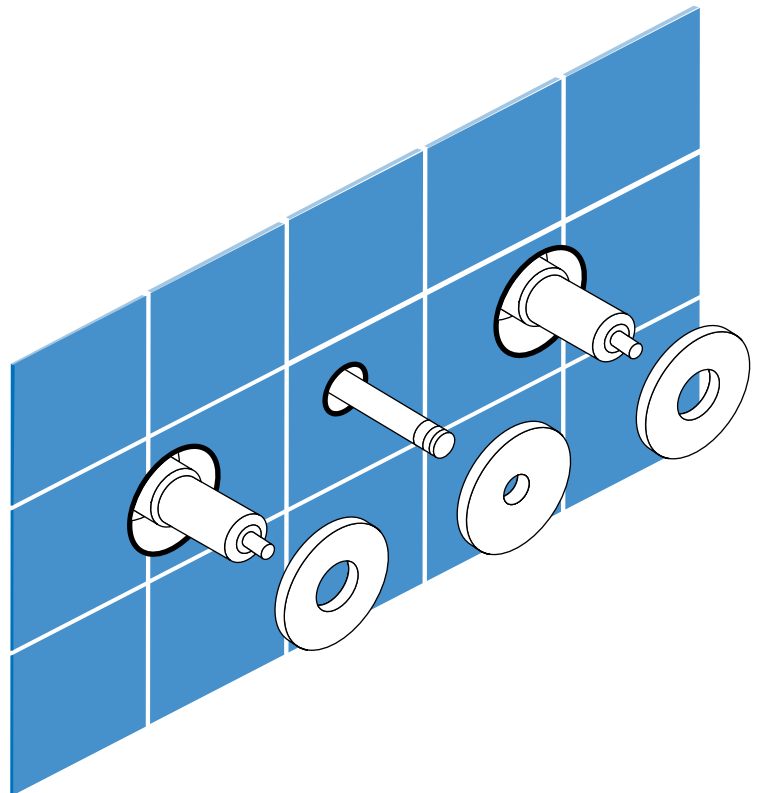

4. Finish Wall

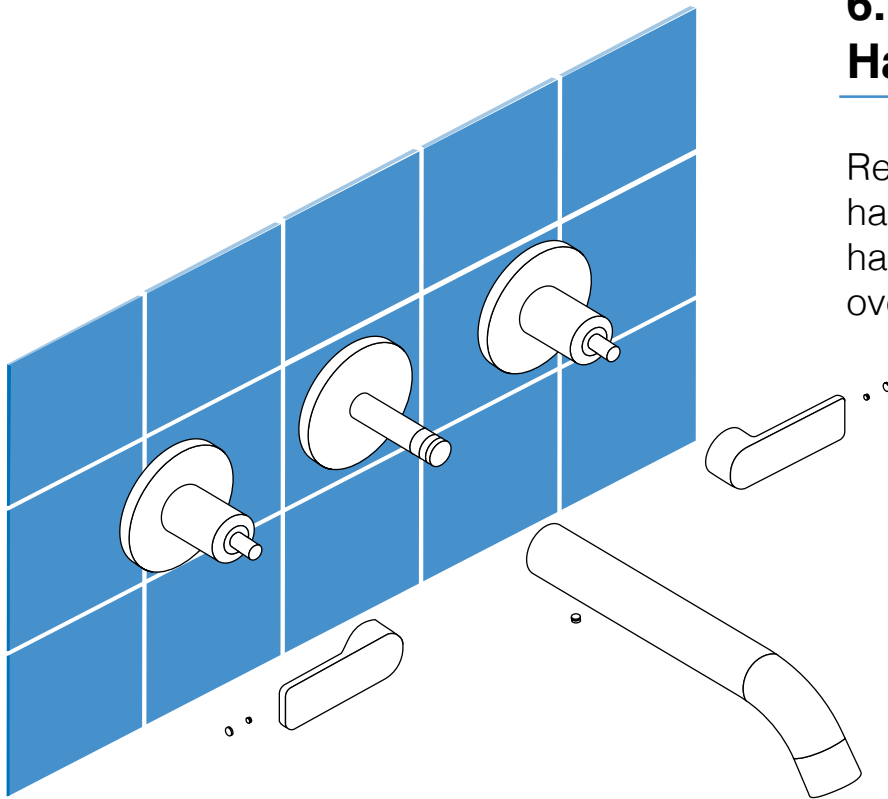

Close the wall and finish with desired exterior. Use the template below for hole size opening and separation.

5. Install Wall Plates

Remove plastic protective caps and install wall plates.

6. Install Spout and Handles

Remove screw covers on the handles and install spout and handles. Be careful not to overtighten.

7. Check Alignment

Check that the handles are aligned with each other and parallel to the ground.
