ASSEMBLY INSTRUCTION:

1.Initial Tightening

Use a hex key (Allen wrench), not a power drill, to tighten each screw to about 50% before fully securing any of them. Fully tightening one screw too early may cause others to misalign.

2.Final Tightening

Once all parts are aligned, gradually and evenly tighten all screws using the proper tools.

3.Misalignment Fix

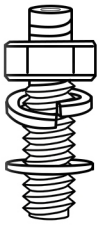

If some screws don't line up, loosen all screws to 50%, adjust the parts, and try again.

4.Stability Issue

If the item feels unstable, loosen all screws, adjust it on a flat surface, then retighten them evenly.
