

BINGO

Instructions

To Win:

Cover a row of 5 numbers on a BINGO card in any direction vertically, horizontally or diagonally.

The Winner:

Must be first to call BINGO after a row of 5 numbers is covered.

Before starting the game:

- A. Carefully separate all cards and markers.
- B. Open BINGO cage: put numbered balls into the BINGO cage. Turn the handle so the numbered balls are dispensed.
- C. Choose the BINGO master -- the BINGO master calls the number that is dispensed from the BINGO cage. The BINGO master places the called number on the master board and checks the winning BINGO card to see if it is correct.
- D. Each player selects one or more BINGO cards and markers. Cover the free space with a marker.

To Play:

The BINGO master calls the number on the ball. Example He calls B10. All players having B10 on their card covers the B10 with a marker.

Note: numbers 1-15 is under B; numbers 16-30 numbers I; numbers 31-45 under N; 46-60 under G and 61-75 under O. The BINGO master places the called number on the master board and continues calling numbers until BINGO is called.

When BINGO is called, the BINGO master checks their master board with the BINGO card to see if it is correct. If it is correct, the player calling BINGO is the winner. If it is not correct, then play continues until there is a winner.

When two players call BINGO at the same time and they are both correct, then each player dispenses a number from the BINGO cage and the highest number wins.

After each game, a new BINGO master is chosen and the cards may be exchanged for new ones or retained.

Warning: Choking hazard -- small parts, not for children under 3 years.
