## PRODUCTdescription

The 2G A-LINE-AL8RS is our 8 ft. Commercial Flame Tower Heater. The new A-LINE series features upgraded hardware, finishes and new eco-friendly heating options. Double baked powder coating over stainless steel as well as **304-grade hardware** make the A-LINE series a workhorse. With our industry first 5-stage eco-burner and upgraded **IR remote system** the A-LINE is the most technologically advanced heater on the market. A Borosilicate Glass tube encases our 4-foot adjustable **"Column of Flame"** that produces **66,000 BTUs** of continuous heat with Natural Gas connection or 8 hours of continuous use on a 20 lb. propane tank. The sleek 360-degree design provides superior heat distribution in a 25 square foot area. **Touch-to-Start Technology** accompanied with our Tilt Switch-Auto-Shutoff makes it safe, simple, and fast. The patented easy-snap magnetic door makes it easy to access the units' burner assembly. Available in supreme finishes and the only natural gas option on the market, makes this A-Line a need for your outdoor space.
